Hello everyone !

I am proud to present Advanced License System.

It's an advanced tool you need to manage your application's licences.

It's coded in VB.NET. The system works with online databases, so no need to worry about that. With little work you can add the system to your VB.NET applications.

That way, you can manage your product and remove scammers if they scam you.

If you purchase the system, you will get support with Team Viewer, Windows Live Messenger, or Skype.

Commonwealth spelling is "licence".
Neither is correct or incorrect.

I didn't spell it wrong
Licence or license is exactly the same
The one word is in English and the other is in English too but to American.
