Thread: [Skype Account Collector - Skype Account Cracking Tool - Free](#)

Psychogenic - June 20, 2014, 3:27 pm

Basically, what this tool does is when you click "Collect", it provides you with a Skype's username and password. They are valid accounts unless one has changed the password. Don't be that one piece of shit to do so, either.

Download: <http://ge.tt/5cDn0Ql1?c>

Virus Scan:

<https://www.virustotal.com/en/file/96f0aa10662c828e4c76a997d2d2142c2aaf856f62c5898df28a8da2de6d0eb6/analysis/1403302996/> (1 false positive so don't be alarmed. Run in Sandboxie if you so please.)

IntelliJ - June 20, 2014, 3:29 pm

Cool tool. Definitely will check it out! :)

Not able to download from the given link.

swagster1337 - June 21, 2014, 4:39 pm

Completely working tool. Loving your shares unofficialcryptic ;)

This is not a virus and has a false positive, this tool is working fine I recommend everybody to use it.

Thanks man

Atai - June 21, 2014, 4:40 pm

Is this running a dictionary or...??

LogitechCamMan - June 21, 2014, 6:52 pm

I can vouch for this product. I tried it myself and the virus is a false positive (as said by OP and many other people) and it works great. I really like the setup of the tool and the overall GUI. I would suggest making the work "collect" on the tool a little darker because it looks like the button is blocked for some reason because it is so light. Other than that, every account that i tried works.

Allison - June 22, 2014, 12:17 am

Wow, this actually worked :P
Didn't expect that

Server97 - June 22, 2014, 2:46 am

Wow looks really cool OP! I'll try it out in abit

Punixz - June 22, 2014, 2:57 am

Before month or 2.. one guy posted a file with a lot of skype:password list..
Is that program showing random skype:password from a list? :o

SSCARL24 - June 22, 2014, 4:08 am

Link appears to be down, can't download.

Sutekh - June 23, 2014, 1:47 am

Works very well, gives you a temporary account to use. Vouch OP!

bangbangyo - June 23, 2014, 9:17 pm

I wonder who told that guy to tell his friend to change the password

LoudScreen - June 24, 2014, 8:27 am

Ok, I have see this working and there are apparently real skypes of people, having said so, it is not a cracking tool. I guess you used a data base from somewhere, but how did you get it?

Downloading... Thanks.

Contest - June 24, 2014, 9:34 am

Looks great although the link is down, ill give it a shot when it loads

xnemesis - June 24, 2014, 11:24 am

Link is down for me, i'm not able to download this program ... Can you refresh it pls ?

PatchKM - June 24, 2014, 11:30 am

I only can vouch for him! <3

Thanks man!

Ninth - June 24, 2014, 8:20 pm

Works Great man :D A lot of the accounts dont work though but i got into a couple

AURUM - June 25, 2014, 4:31 pm

I can vouch for the OP. Works fine. :D Thanks for the share sir :D

Aalewis - June 25, 2014, 6:51 pm

I love how almost everything in the source code is completely obfuscated. Makes it look super trustworthy and unmalicious.

Zombie Virus - June 26, 2014, 6:53 am

I have tired at least 30 different Skype accounts and none of them worked. This seems to have got patched some how or every single person has changed their password. Either way, what ever did happen thank you for making this tool even though it has not worked for me.

bangbangyo - June 26, 2014, 7:14 am

? I remember him saying don't change passwords but people did it anyway!

Complans - June 26, 2014, 7:16 am

Why not just make a Skype account creator? Apart from the captcha, the registration process is pretty straightforward.

e905869 - June 26, 2014, 8:40 am

Fun stuff to do with cracked accounts (If they are still in use.) is spying the conv of the real owner as Skype doesn't disconnect skype account used on multiple machines.

Who knows what you can get.

bustey - June 26, 2014, 2:52 pm

Looks nice! might test it out soon.

CindyK - July 5, 2014, 11:29 am

This will not download. I must be a tard. :(

open download link in firefox or ie... this is known in chrome

simple fix

original filename 1392835309.exe

wtf

carstorm - July 10, 2014, 12:55 pm

Chrome said the file is malicious so I fired up IE for the 1st time in forever :) After trying many accounts I gave up because none of them worked.

Lumia - July 10, 2014, 2:49 pm

Why does a simple application like this have to be 1 false positive ?

4 detections actually. Don't know why. But I just tested it and works.

malidjata - July 11, 2014, 4:42 am

good work, thanks for sharing!! i am tryng..

gregory81 - December 3, 2015, 11:32 am

I tried but accounts are not valid. So I think passwords were modified.

Good work anyway !! ;-)

Nilzers - December 16, 2015, 3:47 am

wont open when i click it does nothing did i just get hacked

Nvm thanks but none of the accounts have worked and I ma little bit disappointed but I like the idea

toica - December 16, 2015, 5:50 am

this is backdoored someone to test it please

kirg - January 2, 2016, 5:16 am

nice tool , was really helpfull :)

thx allot

?MrRoot - January 2, 2016, 5:23 am

Any reason why this connects to 105.98.40.119 ?

<https://malwr.com/analysis/NmUzNzNhYWUwNDIyNGIxODg1MGQzMWEzZWY3Yjc2ZWU/>

It might be non suspicious, but it looks like all the accs are stored in the program since I can make it work without internet, so why does it need that IP?

Also

INTERNALNAME 1392835309.exe

ORIGINALFILENAME 1392835309.exe ??

gabrielchihonglee - January 2, 2016, 5:24 am

Surely that I am going to test it, thanks!

KickAss942 - January 2, 2016, 10:16 pm

Vouch for this product, even bothered to re-engineer it and figured it had no virus.... if anyone wants proof let me know :P

Basic logic....

```
Code public static string JbgqO()
```

```
{
```

```
    return
```

```
BNIJie.IGxNIMiRZctgV(BNIJie.jisk(XKeDXqfq.uJXPngOtrEwC("]fPgPR)P]fPgPUzPDPSPUPPP]fPg
```

```
PYrP^PS@PT@P]fP,",
```

```
XKeDXqfq.TuaXHKjtGWUqJNBZI("61758452166512727937589824927911"))));
```

```
}
```

```
-----  
public static string uJXPngOtrEwC(string t, int n)
```

```
{
```

```
    checked
```

```
{
```

```
    string text = string.Empty;
```

```
    int num = t.Length - 1;
```

```
    for (int i = 0; i <= num; i++)
```

```
    {
```

```
        int utf = Convert.ToInt32(t[i]) ^ n;
```

```
        text += char.ConvertFromUtf32(utf);
    }
    return text;
}
}
```
