Thread: [INFECTED A PEDOPHILE - WHO IS TRYING TO START RATting](#)

MisterSosa - June 21, 2014, 6:29 am

So i have infected this pedophile when i look into remote desktop i can see he is trying to get into ratting and even downloaded darkcomet, how do i prevent this motherfucker from ratting others?

Help me out, you will do a good thing for today

ZuGgY - June 21, 2014, 6:30 am

Delete the RAT off his PC or some shit. Just screw with him.

VRUMM - June 21, 2014, 6:30 am

So how do you know the guy is a pedophile? Child pornography?

MisterSosa - June 21, 2014, 6:31 am

Yes, i have seen him looking for CP alot of times before

VRUMM - June 21, 2014, 6:33 am

(Jun 21, 2014 06:31 AM)MisterSosa Wrote: [\[CITE\]](#) Yes, i have seen him looking for CP alot of times before

Did he ever download these CPs to his computer?

Hopsin - June 21, 2014, 6:35 am

Why you just don't communicate with him instead of doing such horrible things. Maybe he was just browsing and CP pop'd up/showed up.

MisterSosa - June 21, 2014, 6:40 am

Guys there is CP on his computer !

Also he is looking for childporn every fucking day.

This is a pedophile 100%

Eminem? - June 21, 2014, 6:44 am

Delete his whole system32 and fuck up his computer.

ZuGgY - June 21, 2014, 6:46 am

Just don't report him to the Feds as they can and will probably come after you as well for ratting.

You can damage his computer , browser and many more things but you are taking an risk here. Don't forget that you are doing something bad as well which is RATing without his knowledge. I suggest you to damage his computer and uninstall your RAT from him.

Scars On Broadway - June 21, 2014, 6:56 am

why not use this in your favor? if you know what i mean

IAmExploit - June 21, 2014, 7:00 am

Why are you so fucking pathetic, OP? You're infecting other people and act like it's a big deal when somebody else wants to do it. And please, don't give me that bullshit about being a white-hat trying to get rid of pedophiles because what you're doing is just as wrong. When I see these kind of people on my RAT I remove them or I somehow warn them about downloading all the shitty tools they find on the internet because they may get in trouble, and that's because I use my bots for something useful (mining), not fucking around. Everybody was a newbie once and that includes you and I.

I really do like this answer.

As for you spreading your rat, seeing as you have a pedo i question the things you tend to spread with yourself.

Good answer tbh, I feel that there is a whole lot of irony in this post. A RATER who not only caught a pedophile, but someone who is trying to start RAtIng as well. What makes you different OP?

This is true! Are you binding your RAT with CP or what?

domien - June 21, 2014, 7:15 am

Just troll his pc after he downloaded rat stuff like darkcomet. Just let him think that those rat software is malicious.

If he opens darkcomet for example, send a message like "haha you have been ratted" . Just make it clear.

Radar7 - June 21, 2014, 7:27 am

For all you know he could be running a business. and is going to rat all computers to monitor co workers

Anti' - June 21, 2014, 7:29 am

Send him messages something like "your files have been send to the fbi".

Tiszy - June 21, 2014, 7:30 am

Get him to download BShades and report it to the FBI :D

MisterSosa - June 21, 2014, 7:30 am

So if i understand the people who say im just as bad as him because i RAT

So it's wrong that i am worried that it would be BAD if this person is infecting little kids, opening and recording there webcam. and then spreads it on the internet ?

Also "IamExploit", you don't know shit about what i do with my slaves

L?gic - June 21, 2014, 7:34 am

I dont get where all the hate comments are coming from.

OP is in position to give this pedo what he deserve's so why dont we give him some ideas of how we can damage this pedo instead of hating on OP.

Starting to sound like some of you guys dont mind pedo's on the Internet. Yes, RAting is wrong but lets remember we are on HackForums ffs.

How did you infect a pedophile then? And aren't you doing the same thing since you looked through his files and watched what he did? Tell me, is it any different? What if somebody has a RAT in your PC and plans to report you to the feds?

jonysousa - June 21, 2014, 7:44 am

Lol probably each one of you already tried RATing but still you hate on him because he found a pedofile? Now tell me, you preferred you kid being watched by a 50 bald fat and perv or you prefer to have a RAT on your computer that you can clean up? (maybe 1 or 2 acc les but ho well)

Serious tell me, because you are hating on OP but you forget that if you had a kid you wouldn't like to know that he/she was on porn ffs!

So OP just do your thing (FBI, fuck up the PC, BM him, steal all the cheatty money he has and BM him, your choice!).

Because its a fuking pedofile!! Think about it! RAT or CP??

Just no more coments on this.

I just dont understand why you are protecting this guy.

How i infected him does not matter, i can ensure you that it has nothing to do with childpornography.

mhm something weird in here...

Anonmoosekaab - June 21, 2014, 9:51 am

I would write up a little program that checks for DC downloads by checking the md5 hash with the official site and corrupts his DC every time he downloads it by writing random bytes to random places in the DC executable.

Holt - June 21, 2014, 10:43 am

I think some tampering with system 32 is in order.

Thomas Jefferson - June 21, 2014, 11:44 am

Just install a annoying survey locker.

What you can do is you can Swatt the man's house. Make sure you get somebody who can dox him or swatt him. I fucking hate these internet pedofiles. While swatting make sure to spoof your phone number, Use an online caller, Use a VPN, And try to stay on the call for like 2 minutes. If you can't, Get somebody who is professional to do it

Dumbest advice you can suggest. Instead of being a skid, and wasting the police time. He should remove this said person from his server. And think back even though this guy's a creep. You're just as in the wrong for spying on him.

He tried to spread his Darkcomet RAT right here, on HF with a "DC Spoofer". I wanted to post proof it's backdoored but when I refreshed the page of his topic, it was already deleted. ?
