Thread: [Problem purchasing L33T using PayPal](#)

'Tits McGee - June 21, 2014, 5:02 pm

When buying Witza membership through PayPal I get this error message:

'PayPal order processing is not available. Please select another payment method.'

Any idea how to fix this? My PP is verified and has a linked card, and all the info I filled in matches my PP info.

Any help would be appreciated, thanks!

Use different browsers or give 48 hours and try again. Or call paypal on Skype and they fix it.

As the user above suggested, try using a different browser or just delete your cookies and whole history.

Do the above and make sure the amount is in USD.

Clear cache, use a different browser, if none of these work, try in 24 hours.

As my good friend here said call them.

If anyone else has this problem - cleaning my browser cache worked for me.

Thanks again for the help

I had this when I purchased, I just had to wait and it worked later.
