Thread: [Insert my name for a intro template](#)

Stylish™ - June 22, 2014, 1:09 am

Hey there!

I currently do not have the programs to be able to open and edit the template to change the default text to my name, so can someone do that for me? It would be much appreciated. ?

Link to template ~ <http://www.mediafire.com/download/eybgjgdkemyr5si/Template.rar>

Please change 'template' to 'AidannYT'

Download doesn't work for me. It takes you to some MultiUpload, and I don't know how it works. If you PM me the download link I can change it for ya :)

Was going to help you with this.

I did belive it was for Photoshop, it is actually for AfterEffect.

Still looking for this, you need Adobe After Affects to do this!
