Just because you couldnt hit off a home connection with 2 shells does not mean the shells are weak.

It just seems like you do not know how this works.

Anyhow all shells are random people might get strong shells and might get not so strong shells

however my shells are not weak your target is either too big or you're getting the wrong ip. Th
eshells i sent you knocked the shit out of me.

Wrong, ~6 shells were hitting at about 300mbit/s for me, my friends, and my shells all died within just a couple days though. One shell is not supposed to be as strong as an API, shells were made to be grouped together with hundreds, thousands of other shells and attack.

Fox™ - June 26, 2014, 10:12 pm

I'll grab four shells. <3

Thanks bud.

Goldbach - June 26, 2014, 10:28 pm
