Thread: [\\$7.5k a month from apps](#)

Intellectus - June 24, 2014, 11:46 am

So, thought I would share my earnings from when I've been gone.

Google takes 30% -> My earnings -> Total earnings from that month

Winners - June 24, 2014, 11:47 am

Wow man, those are some nice earnings. Keep it up! ?

Thank you ? I've gotten my 2 strike regarding copyright material on Google Play as today. But I'm trying out ads, even though it doesn't pay that much. Here's a picture of 10 000 (I have about 70k + users on an active app) users and earnings on one day from it:

... Basicly just so crap that it isn't worth having ads on it. Trying out another network now though ?

DiamondHacking - June 24, 2014, 11:51 am

Nice, congrats man.

Glad to see I'm not the only one making money on HF.

eightz - June 24, 2014, 11:52 am

Is it generic flappy bird games? Can google hold you for copyright to do that? I myself have a app, not as much as you but close. I plan on opening up more apps.

I have this method on working out simple apps that just require 1-2 hours of work and generates several grands. It's just about serving the right app till the right time. And no, it wasn't some flappy bird game ?

Sounds like you got a good method there. I would love to triple my earnings.

I'm guessing you have knowledge on coding?

Don't go out and trust that many though, I gave out my idea to one here on HF who made one app for "us", which he kept for himself. It costs about \$2 and he's already sold between 1 000 - 10 000 copies, I'm guessing he's hitting the 10 000 mark soon.

Yeah, some. But this is more about marketing again ?

Yeah, he's being a dumbass for not sharing it 50/50 as I told him. He could've earned way more as I only see my app making him money on his developer account ?

Thanks brother ?

I'd love to become an app developer! Which languages have you learned and what's the genre of the app? Just briefly like a game or some other app?

Well played on your earnings as well!

Becoming an app developer is easy, you don't even have to know java (Android language) to code. Just use phonegap with CSS3, HTML5 and JS and everything will be perfect. You can also use JSON, API's and forth.

Thanks ?

Try going to the User CP and click Edit Options.

Then toy around with these Message and Notification settings.

Also, congrats on your app revenue. That's good money.

Do you mind me asking if it's 3 strikes to be perm banned by Google? I'm on my 2 and there isn't any proper answer. People are saying they got banned on their first violation, other say 3. Some say 2 and even 10...

I just looked into this, but I hate having to use CMD to do everything, but thank you for that. Will it work with PHP pages?

You'll just build the apk in phonegap through your web language files. But no, php isn't supported. But you can replace php with JSON for example ?

My 3rd app got suspended today. Holy.... I wonder when Google terminates my account!!

Probably depends on the severity of the offence, I apparently broke copyright law twice and was racist once??

Gitty Brothers - June 28, 2014, 12:38 am

What advertising networks do you use? AdSense/Admob?

Intellectus - June 28, 2014, 6:37 am

(Jun 28, 2014 12:38 AM)Gitty Brothers Wrote: [\[CITE\]](#) What advertising networks do you use? AdSense/Admob?

I use AdSense for my websites, but regarding networks for Android apps I've found out that Admob and Mobfox is bad. With Mobfox you generate \$0.22 per 1 000 impression, while having a CPC at \$0.00. Where I can instead charge \$2-3 per install on every app, which generates so much more money in the short run. And the thing here is that you don't have anything else than a short run. As my app with 70 000+ users got taken down yesterday, it had ads and didn't generate anything else than a few dollars.

^This app got about 500 - 1 000 users per day. In my best month, about 2 500 users per day.

Thank you everyone ?

LionHeartLow - June 30, 2014, 2:31 am

Do you make spinoffs of games? Sort of like Candy crush - king crush - candy rush, etc, how there's many different variations of the same game? And do you slap adsense ads onto it?

wicked earnings!
From this comment I guess its more like this:
Copy past the latest hottest selling app
Rename it to something similar
Change the names of a few key things
publish
watch money roll it.

But that's just a guess. :D

Dont fall for intellectus scams. He offers to buy an ebook and edited this post removing that it is a scam method he is using. His method is completely illegal and here you can find the scam report

about it which i made and plenty of his customers replied to agreeing with me that they have been scammed by him.

Be aware of this guy as he is not legit!
