Looks good. I am hoping to buy this in the near future after seeing vouchers from members.
Also if you are giving away any vouch copies lmk, I'd love to test this out!

Horny - June 25, 2014, 8:59 am

You should add a ip range for the scan.

Looks like a good scanner still.

1. Fix your payment system if I had \$0.10 i could bypass it.
2. Is your perl scripts obfuscated?
3. if they are can i try to crack it? since the name is Crack Me i thought i would ask ;).
4. why use perl? why not use asm or c? less risk of the scripts being leaked and less risk of them being cracked
