Thread: [Hack Forums need's a Blogger/Blogging Section](#)

CyberAlien - June 25, 2014, 12:47 pm

Well, before making this thread I made a search if there was any topic/thread and i found only one suggestion like this 2 years ago :

[Must have Blogger's Longe/Section](#) - posted by APEX.HACKO and it didn't get any reply so it was closed.

Blogger section would be really great and helpfull for millions of people who use blogger (it would push people to register in HF in order to gain access to posts). It would contain about posts, AdSense, SEO, Tips, Tricks, Widget, Templates and much more.

Thanks,

OP we have a whole area dedicated to this with many sections covering what you're mentionning. Check out the [Webmaster](#) area.

Yea, i can see at Website Construction there are sub-forums Wordpress, Drupal and Jomla but there is missing Blogger, to be more specific you understand me.

Skorp - June 25, 2014, 2:26 pm

There is no need for this, sorry OP.

Positive - June 25, 2014, 2:34 pm

Use the sections we currently have.
