Hey, you must be using a method to gain these alts to load them into your data storage. If you tell me the method, I could use it and give you alts thus saving you the dirty work and I'll also keep a

few alts (for my own griefing purposes), but yeah. I also have 2 other methods that are not efficient, I can give you them too.

It seems our obfuscator disabled Alt Dispenser from working when our license ran out.

It will get fixed when I get home, which is in one week, and when I get home I will give all customers who has been affected a free 30day license.

Again, I'm very sorry about this.

All customers who were affected have had their license extended.

Alt Dispenser will be web based in one week, stay tuned!

EDIT: It seems we had to change obfuscator once more. I'm sorry for what has happened, and I've again extended everyone's license.

I am in discussion with Cycles to bring the customers of Alt Dispenser a web application for users to directly generate from. Cycles is still operating this business so do not worry.

Frivolity - July 27, 2014, 1:50 am

As I've been gone for quite a while now, the database has gotten somewhat out of date.

Currently working on completely renewing the database, with a lot more alts. All customers are getting a free 2-day extension.

Thank you for being patient.

Regarding ComputerTrophy's post; As for now I'm closing sales in order to implement the web application.

The current windows application will be fully functional and get updates for 1 month, after that all lifetime users should have their accounts transferred to our new web panel.

Database has been cleaned, and all generated alts should work now.

We do not offer any API at the moment, and we do not plan to offer any in the near future.

Database has been renewed with 100% working alts.

Previous database update shrinked the database a bit, sorry about that. Won't happen again.

AJAX implementation is coming soon (generate alts even faster).

Are you interested in a full access/alt API for generators?

It has 5k accs in the database, PM me when interested.

What is the difference between 1 user , 2 and 3 users ?

Is there any limit on generating account ?

If i get an account will other user see it too ?

Most likely, but the accounts are however fully usable in the client.

1. It's the amount of friends you can share your account with.
2. The only limit is the time period you bought Alt Dispenser for. If you have bought Lifetime, there is no limit at all.
3. There is a chance for that too happen, yes.

Please read our [FAQ](#) before asking questions.

Looking forward to buy it but what do you mean with users? Is it like how many alts you can generate per day, how many that can use the alts or how many that can use your user on the

dispenser?

It's how many people that's allowed to access your account.

New Feature Added!

You can now report any broken alts and it will instantly delete once it hits a certain number of reports. Hopefully this will stop you guys getting bad apples.

Technically it is Unlimited for the clients, because Unlimited means there is no limits, and as far as I can see Unreal always renews the database. As long as the user is not stuck with limited accounts it

is unlimited. So yeah it is unlimited for the users who use alt dispenser.
