Thread: [Free TS3 Virtual Server](#)

The Grand Pooba - June 26, 2014, 7:10 am

I recently acquired a NPL from TS3. However, my server does not get that many users so I have plenty of other slots to distribute to another virtual server. I pay for hosting for it anyways through OVH, so there is no reason for me to have a ton of extra slots going to waste.

Details:

- I am giving a way slots ranging from 10-50 depending on what I have available.
- You will have complete control over your server. (I will give you server admin and demote myself).
- The IP will be either (NumericalIP):(Port) or if you have a domain you route to the address (domainname):(port)
- This is completely free of charge, and you can stop using it at any time.
- Any attempt to exploit server query or anything along those lines will result in the removal of your virtual server.

Send me a PM with the amount of slots you would like, and I'll let you know if I have any more available.

I want admin to it (ofc) :D

Spoke about it, you now have a 50 slot server!

I will be giving away another virtual server in the near future when I see whether or not this works out well :).

9 Virtual servers totaling 190 slots distributed to the HF community! Right now I am capped on available slots and will have to put the giveaway on a pause until one of the current members decides they no longer want the server. It was a pleasure guys and keep a watch for another thread like this if slots become available.
