PDF Oday. How To Inject Your EXE File To PDF File For Mass Spreading.

this process explained the method to inject any pdf document with your exe file. this is for educational purpose.

[Video: https://www.youtube.com/watch?v=N7Qp-aBQ3_o]

will only give further support to those you appreciated my efforts.

"educational purpose." hehe

nice tut if I come across a problem Ill come back

thanks man

!!!! - June 27, 2014, 2:25 am

I appreciate your effort mate but unfortunately I didn't understand anything! It looks like a demonstration and not like a tutorial.

Hope you can make a textual tutorial! Thnx!

Hejted One - June 28, 2014, 6:02 am

It isnt anything new.-_-

It know it since 2011. It is using Hex Viewer .

suriya1873 - June 28, 2014, 6:58 am

thankz bro ..! its new to me , learnt something for this

Talu - June 28, 2014, 12:37 pm

Thanks for sharing this tut, looks good.

HeXplosion - June 28, 2014, 6:13 pm

Looks great. Wish you could have gone a bit more into detail but I'm sure I'll be able to figure it out.

Cheers

thanks for this video, but can you share in format text please...thanks

Lagosian - June 30, 2014, 4:28 am

would love to put a full text tutorial but many people here will use this to offer conversion service in other forums even here in HF. and might cost real security treat. am sorry.

T-rom - June 30, 2014, 12:55 pm

not to mention the video was from someone showing him on Teamviewer or anything but I am not sure he fully understands it himself

Not trying to be a jerk!

from what I can see its just replacing some code to run your file as well. Hex edit

maureenaxelwood - June 30, 2014, 1:03 pm

Can we pay for a tutorial this looks really good

FallenSolitude - June 30, 2014, 5:05 pm

Thank you for this video I got 3 slaves more then I had before a day ago.

T3chnophilia - June 30, 2014, 11:09 pm

yesss been looking for this your the man!

I just realized this is a fake video. Whoever's using the "BUILDER.EXE" is just using a renamed open source hex editing tool. Each time he makes a change to the hex, he's simply copying and pasting random shit from his textbox history and then canceling the change.

I call BS.

Posting here to bookmark.

Looks cool ill check it out

Die Jude - July 2, 2014, 5:10 pm

Nice tutorial, bookmarked video for morning :)

mtboy - July 3, 2014, 6:14 am

though doubt it, still trying to reproduce wt he has done,
btw builder is not the programme original name, not sure whether he was using flexhex or hex edit

iJacob - July 3, 2014, 8:53 am

This is a great method for mass spreading

vikramkhore - July 5, 2014, 4:14 am

does anybody made it sucessfully? m eager to know

Yep. He hit cancel every time.

Bullshit.

I do not understand how you can come here and post a video like that.

You see very well that every action then press the delete button.

I do not understand what purpose is achieved and publish a video like this right here ..

Lagosian - July 10, 2014, 2:58 am

the real ones will see the real trick in it. its just not nooob friendly. i do not expect all kids to know it.

ofcourse its hexing. but hexing for the real ones.

Go Play with toy. this is not for kids.

Monty Python - July 10, 2014, 9:33 am

Thanks for this tutorial so much m8 I will bookmark this and totally check it out later :)

And if a exploit is on here its no longer a 0day because people know about it. A zero day exploit is a exploit nobody knows of.

Elixirz - July 10, 2014, 12:04 pm

This is why I do not download anything on Hack Forums, especially ebooks.

Not after 10 years. This is only good for historical purposes today. Please leave such old threads buried.
