What about something that hasn't been done 1000 times here on this forum, how about something usefull and legit, how about something where everyone can say, yes this is nice. How about something that you didn't use copy-paste.

A release is a release, thus you should be thankful.

Good luck on future projects OP C;

Yeah but sorry for saying, a release doesnt mean its a good release. My home grown potato's do a better job then this.

BerryP - June 27, 2014, 10:29 am

Why you wouldnt give it a cooler name than "(multitools)", maybe "*enter cool 1337 haxx0r killer name* Bomb3r" (like your name) or "bomb3rman multiDdoser"

And adapt the GUI, but the standart windows theme is perfect :)

Peace ?

iStalker - June 27, 2014, 12:02 pm

Hack Forums need to create a sub-section in the VB section and call it "Skype Resolvers, DDoS bullshit and IP Finders".
