use Spigot. replace your craftbukkit with the Spigot jar. It's /much/ faster, and has a built-in XRay plus many more config options.

what type of server are you looking to set up, as i've ran servers in the past I could help you.

Will spiggot work with the plugins used on mcmyadmin? and really just a lounge sever/creative faction. craftersrefuge is a good example

ObsidianDestroyer

NoCheatPlus (NOT AntiCheat, it's buggy and overall sucks)

Factions (obviously)

McMMo (only if you plan on doing a lot of tweaking so it doesnt get really OP. cap all combat skills to something low is what I'd do)

Set up Buycraft of course

I'd use GroupManager for permissions

AutoBroadcaster or some auto-broadcasting plugin

Some type of voting plugin

At either the top or bottom you should put the IP in plain text for easy copy-pasting :) It is nice to have for some people, lazy as it is, and is better to have especially with a number IP rather than words. Just a suggestion!

Ulysses S Grant™ - June 29, 2014, 3:57 am

I'm guessing you're trying to grab some hackercraft fame or try to recreate hackercraft. If so, Hc was unique and can't be done. This is like the 3rd "HackForum MC Server" I've seen this week.

I have yet to see any others. I'm not trying to be hackercraft at all. It's bare bones normal minecraft server with a few plugins. I don't expect anything. I just have it up for some people to play.

Also it was a pretty damn good price. So i snatched it up. I know hackercraft is no longer running so

why not offer my server out there.

perms aren't fucked, and that's because i set them up

whats fucked is the:

\$5 for a fucking horse and saddle

\$2 for a faction

the perms for other ranks other then the one i set up (normal)

/nicks

spawn

motd

an owner that knows more about MC

fix these things and then it'd be ok. but still it wont be great because you don't have experience running servers. i also think you need to re-evaluate staff

a LOT has been updated since you were last on. Perms DID in fact mess up for some random reason so we re-did the entire thing. You can find a horse and saddle if you really don't want to pay. As far as factions it's two fucking dollars. I don't make any profit off of this i literally have it just for hf members to play

New spawn is being built.

MOTD not high on the to-do list. PVP arena and new spawn are.

nicks are working fine

Learning as i go. Never said i knew a lot about minecraft, just enough to get me by. We have many wonderful members helping out and making it awesome!
