Thread: [benny_boy is reselling my product \(UID # 2206180\)](#)

Kenny West - June 27, 2014, 7:06 pm

So, I'm too lazy to post any screenshots (though I probably will later) but I'd like the community to know that UID #2206180 ([benny_boy](#)) is reselling my product without my consent or permission.

To make this short, I was selling a completely setup autobuy website designed for the non-developer ([see thread here](#)) and I sold it to benny_boy. This was where I made a mistake. benny_boy is one of the most incompetent users I've dealt with on this forum. He was unable to get the website set up correctly and blamed me for my faults despite me providing him with extremely detailed step-by-step instructions.

He then decides to open a PayPal dispute against me claiming that the product was not as described, even though I'll sold it to other users on this site who have had no problems (I'll link them here when I can gather their names, but if this is you, please feel free to verify the previous statement). He also decided to flip the script on me and sell my own product without my consent, permission, or even asking.

He also just became an ub3r today which I don't really see as fair and I do hope he faces some disciplinary repercussions due to his action.

In case, he tries to say he's not selling my script, he wasn't even smart enough to change the readme included with the scripts as shown here.

Seems very legit. I'm not sure why he would of stole it, anyone reckon I may be able to get my money back from benny_boy so I can pay the real owner of the script Kenny West.

Eclectic - June 28, 2014, 3:11 am

Seems like a legit report, I did notice him selling this and after seeing you offer it to me for \$65 and him for \$5 I was wondering what was going on. I can't believe I though of doing business with him, glad I didn't. Thanks OP!

SFaisalShinwari - June 28, 2014, 3:17 am

I talked to benny_boy a while ago about this problem. He told me he had full resale rights and was selling it for \$5. I knew something was dodgy because a good script like this is not worth \$5.

I myself bought this script of Kenny and althought it needed some bug fixes, if you get someone to help you, it can easily be setup and running. (<http://carnageshop.com/>)

benny_boy has scammed alot of people. PLEASE be aware. Also sorry for your loss Kenny West. A great script has been leaked. :(
