Thread: [\[FREE\] Giveaway signatures and avatars!\[FREE\]](#)

Hastur - June 28, 2014, 6:48 am

Hello! I'm just good at graphics. I would like to give out some signatures and avatars. I can do both. Gif and. Jpg it does not matter to me! I work in photoshop cc, and you can also get the file I was working project in. If you're wondering why I do it, it's only because I think it's really fun to be a little creative in photoshop!

What you need to do is just to comment what you want it to be for something. Should it be an animal? Should it be a logo? Should there be any? I'll do anything for free in this thread! Just give me a little time, I work pretty fast but I can not do 10 pieces simultaneously. I also prefer that you comment in this thread instead of PM me. I am completely free in a few days and forward. I would just be awesome happy if you could comment exactly what you want!

It has been the archangel- and I'm out!

pece! <3

notice... I'm only giving it away if you got 50+ posts and If you're L33T or Ub3r!

Create me a signature to do with physics and the physicist James Clerk Maxwell.

No other specifications apart from those two.
