(Jul 16, 2014 10:05 AM)Jack246Jack Wrote: [\[CITE\]](#) My honest experience with this book is as follows, The method that is used is very simple to follow and has a 100% success rate for me so far and I cant see it ever failing to be honest. I have been using it with Clash of Clans and so far have gotten 6x 14,000 gems using this method so for the \$25 I paid its well worth it. It requires 0 social engineering and everything is set up for you from the start. I spend on average 2-3 mins using this guide per 14,000 gems I get because the method is already set up. The only reason I have chosen to slow down a little with my usage on CoC is because I dont want my base to look suspicious. So in conclusion you wont regret buying this Ebook if you spend time on apps with in app purchases. So a HUGE vouch for The Don Killuminati <3

Also after purchasing some other Ebooks from HF I have felt kinda cheated and tricked into buying them but that's how I felt after purchasing this Ebook, so once again <3 The Don Killuminati! And sorry if it sounds like Im kissing his ass. Im just very happy with my CoC base now :P

(Jul 12, 2014 12:03 PM)svensonic1 Wrote: [\[CITE\]](#) This is my review:

Method (10/10):

I tried this method 2 times on Clash of Clans and it worked successfully for me and got my money fully back.

Originality (9/10):

There are ebooks similar to this one but that ebooks are saturated and will probably not work, this one will work 100% for the first 5 times and it works on every game in the appstore with In-app purchases of course.

Design (6/10):

It was just a simple .txt file but it is readable and easy to understand.

Overall (8/10):

The method itself works great and I got many gems for free with this method and it should also work with other games like Castle Clash etc. Only the design is quite low because it is a .txt file but it is readable and understandable. Don't hesitate to buy.

Is the initial investment legitimately buying the iAP? So if I wanted a \$5 package from some app, then I would need to invest \$5? So if I wanted the \$100 package I would need to invest/pay for it first?

Technically you could stick with the \$5 until you reached \$100, a little slower but works. Instead of having to use a \$100 investment. Tho if you want more faster, you should use more. (In theory). ?

Also for customers do note: This isn't any leaked "refund" method or the "SE" methods nor the "unauthorized charge".

It just allows you to get your money back too. ?

Sorry about being "that guy" on the thread, but can I asked how this 50% discount works?

As it looks like you just doubled the normal price and made it 50% off of the doubled price, which is still the normal one...

Would 50% off the Basic package be \$15? Or is the basic package \$60 now?

I can guarantee you guys that this works. I know the method myself & I used it myself.
I only paid €8,99 for 1200 Gems and I already got like 6000 Gems of it.
BTW: I will post my CoC base with my 5 builders soon :p

This is my review:

Method (10/10):

I tried this method 2 times on Clash of Clans and it worked succesfully for me and got my money fully back.

Originality (9/10):

There are ebooks similar to this one but that ebooks are saturated and will probably dont work, this one will work 100% for the first 5 times and it works on every game in the appstore with In-app purchases ofcourse.

Design (6/10):

It was just a simple .txt file but it is readable and easy to understand.

Overall (8/10):

The method itself works great and I got many gems for free with this method and it should also work with other games like Castle Clash etc. Only the design is quite low because it is a .txt file but it is readable and understandable. Dont hesitate to buy.

My honest experience with this book is as follows, The method that is used is very simple to follow and has a 100% success rate for me so far and I cant see it ever failing to be honest. I have been using it with Clash of Clans and so far have gotten 6x 14,000 gems using this method so for the \$25

I paid its well worth it. It requires 0 social engineering and everything is set up for you from the start. I spend on average 2-3 mins using this guide per 14,000 gems I get because the method is already set up. The only reason I have chosen to slow down a little with my usage on CoC is because I dont want my base to look suspicious. So in conclusion you wont regret buying this Ebook if you spend time on apps with in app purchases. So a HUGE vouch for The Don Killuminati <3

Also after purchasing some other Ebooks from HF I have felt kinda cheated and tricked into buying them but that's how I felt after purchasing this Ebook, so once again <3 The Don Killuminati! And sorry if it sounds like Im kissing his ass. Im just very happy with my CoC base now :P

That's literally just saying they don't care about your purchase after 90 days.
