The 280 is a very good card and the one you picked has a pretty good cooler. If you're looking to spend under \$300 this is a card to get. I would also recommend you get a 1920x1080 monitor to go with it. If you can't it will do exceptionally well on that resolution.

R9 cards are very good and cheap, they do tend to get hot. Just keep one or two cards.

If you are looking to buy it, sell your old graphics card to me.

I would go with the sapphire one its much cheaper and its still a great cooler.
