You don't need a phone, or any existing coding knowledge. However, you need a Google Developer Account (Google those keywords to find the registration page). I will reckon it takes a night to have everything going, that's at least what my customers have been using, some are totally new to it too!

All who have bought it seem super happy about the ebook and purchase. Those who have deals under \$80 are friends, and many of them have bought too.

"Hey you don't have to sweet talk me, my sales rate doubled just as you assumed."

It's effort involved and it's about how you work, you can find the proper thing you are looking for in 10 mins or 2 hours. That's up too how you control the information given.

Yes, you will be able to use this method with a mac.

My first review, even before my first revenues :

- The ebook is really really hard to understand, OP is obviously not a native speaker. Some steps are in other txt files within subfolders, so a little work needs to be done to have a perfect presentation BUT, OP is a VERY nice person, answer and explain everything over Skype.

- OP said there is no risk of saturation, but my opinion tends to differ. 20 persons on this technique and the market will be saturated already.

- It's a great idea. Not the best of this year, but definitely worth some pennies.

I bought this ebook three days ago, I will be posting revenues once I get some. This method does require a lot of work in my opinion to generate some money. I did not wake up the next morning to "already earning more than half of what I invested" like FluMist, but I am sure that I will be making money soon as the method is very promising.

On another hand, the OP is a very kind guy and he is willing to help you earn.

Intellectus - July 8, 2014, 2:46 am

(Jul 7, 2014 01:47 PM)tayax Wrote: [\[CITE\]](#) My first review, even before my first revenues :

- The ebook is really really hard to understand, OP is obviously not a native speaker. Some steps are in other txt files within subfolders, so a little work needs to be done to have a perfect presentation BUT, OP is a VERY nice person, answer and explain everything over Skype.

- OP said there is no risk of saturation, but my opinion tends to differ. 20 persons on this technique and the market will be saturated already.

- It's a great idea. Not the best of this year, but definitely worth some pennies.
The book shouldn't be a problem to read, it might be that there's some new websites and stuff to go through. As I've made sure that it's not my English, even though I'm not a native speaker either.

There isn't any risk of saturation, and I can make a chapter on why it isn't. But let me tell you something here, the reason why it isn't any risk of saturation is that new apps are created each day, new things are created each day. Saying this would become saturated is like saying sex could become saturated.

Thank you for the review though ?

My Review of AppMoney *I have bought this ebook

Main method : [9/10]

This method was very easy to get started with even though there was a investment required.

Grammar : [7/10]

The creator of this method has some decent grammar but it was still easy to read.

E-book layout : [8/10]

This e-book laid out all of its text and its titles with a basic layout, nothing stunning. His photos and text were easy to understand and i personally had not problems following with its layout.

Overall : [9/10]

I've read plenty of e-book's over my time on Hack Forums and this is definitely one that you should

pick up. I will be posting earnings proofs a little bit later.

A Fox - July 8, 2014, 3:24 pm

very happy I bought this, Im gaining more and more every hour.

I totally recommend this method, if you have any problems intellectus is there almost always to help.

I have also paid for this ebook.

I have spoken to the OP several times on skype & he has answered every question I have tossed at him.

He even sent me some extra tips via skype w/o me asking.

The method behind this is flawless, You just need to get creative & money will come rolling in.

I will post earning proof ASAP.

It's expected to get your whole Google Play Account suspended after some time (Hopefully months), as I'm having methods to avoid suspends. But it's a repeat system that won't be too much of a hassle as you'll make autopilot money for years ahead ?

I firmly believe this ebook is of higher quality than other "shitty" ebooks sold on this forum. While

this may be pricier, it is much better than the shit I've seen come from here before.

Good luck with your sales, Intellectus, and I apologize for drama we ran into before.

I mean, OP stands very strongly by that it can't be saturated. I think it can be if their is enough competition.

Currently it's not saturated at all, but it's definitely possible for you to compete with someone else who bought the ebook.

Let me get this straight for you guys. This method can't be saturated as the market is too big. It's like sex, many people can have sex with the same people and still have sex; It's not relationships. You could get this explained by me if you bought the ebook. Unfortunate, that's all I can say without revealing too much.

RE: This ebook is also made so that you'll need help from someone who knows it in order to understand it fully (The help will be received by me). So that makes it harder for it to get leaked.

Also, if 1 million people used this ebook, maybe it would get saturated. But since I'm getting 1-3 sales per day, I wouldn't dare to even think about that 1 million users if I were you. Because, it won't happen.

I can't vouch for this as I haven't bought this method myself but I can vouch for OP as I've seen his work before!

This is the only eBook I've seen that actually looks legit and that seems to work. It is also pretty obvious when you read through the comments on threads like these to see which posts are fake vouches and real. Everything seems to be legit so far!

Reason I'm saying this is because before Intellectus released this eBook I had seen some of his

posts about a month ago or so explaining how he makes money and he said through Google Play and Apps, he also posted a screenshot of his earnings and I doubt they were fake since he had no reason to fake them at the time, therefore I don't think this eBook is bull either.

OP I've seen you around before, you have posted in one of my threads before and you seem like a nice guy with knowledge!

I wish you a continued luck with sales and all the customers with their earnings! ?

That's because most of the people are putting up apps of example's I've given rather than doing the research themselves (Their only effort). They are just scratching the top of the iceberg.

RE: I've just went through many of my customers apps to compare them with others. There is nothing getting saturated. If you guys are planning to trash my sales to keep everything for yourself, please don't.

Not willing to trash your sales thread at all, but the saturation is a fact.

As long as there is not unlimited choices or resources, it will get saturated. and Good niches are not unlimited at all.

The ebook is still a great value, with ROI guaranteed, but don't expect to make a killing from it.

Again, I've tried to look at other customers and they seem fine. Some apps are clashing with others, but there are many out there who has only one app up from the niche.

However, don't expect to quit your job so easily over this though. That's true.

Too bad its getting saturated.

Exposed the ebook? Relayed made \$500 in 8 days. Lurk made \$400 in 5 days. Tayax is making like anywhere from €5-10 a day.

If only Tayax keep up with his earnings his, he will make €300 this month at minimum. If you give it your full and do some effort, you can end up with \$2 000 this month. Saturated, alright cool. Miss the chance.

Stop being greedy folks. At the lowest rates of those who have bought the ebook you'll still profit like 3-5x as hard as the ebook costed within just one month, and that's at the lowest ratings. But I guess my words doesn't even count.

Sonymous - July 15, 2014, 11:37 am

Yes folks, I'm having issues with OP on definition of saturated, but beside that, it's making money if you put some grease elbow in it.

zakrib - July 15, 2014, 2:19 pm

edit: scam report on appmoney is here - <https://hackforums.net/showthread.php?tid=4359524>

This can make you money, I bought it and am using it, I checked and have currently made 30\$ in the past 3 days.

Unfortunately I am going to have to agree with tayax on the saturation part. Would also like to mention that Relay knows scripting and is selling "his" guide for 50\$ (he tried to sell me however I did not buy it), Using only OP:s guide will make you about 10\$ a day i would say, Relay said he

scripted his own app and is selling it. So if someone would want to make 500\$ (which I highly doubt is possible) you would have to pay 80\$ for OP guide and another 50\$ to relay to find out how he is doing, thats 130\$ + the 25\$ which you need to start off = 155\$

So basically if you want to know how RELAY made his 500\$ you need to pay 155\$

Not trashing sales, simply just giving people a reality check.

I read why OP said this cannot be saturated, but I can give plenty of reasons to why it can be, dont know if commenting here to why it can be saturated would leak the guide or w/e, if OP wants to know my reasons to my belief and why I agree with tayax, give me allowance to type it out here and you will understand (maybe I am wrong maybe I am not, read what tayax said which pretty much sums up most of it). After this 2 weeks has passed I will leave a full LEGIT review of what i think of this guide, and how much I made from it so far.

If you have not paid for this.. (and by this comment above it does not seem like you have) you should not reply in this manor. If you have no intentions in buying this guide, then you should keep your comments to yourself & get off the thread, what your doing is sales trashing, and breaks rules.

THIS IS NOT SATURATED.

Simply because the guys app got copied & his earnings went down you think its saturated, your pathetic & really need to go back to your childish ways of earning money.

I have not made much from this, but I have not put effort in. This is my own issue, has nothing to do with saturation lol.

Stop commenting about saturation if you have no money or don't wish to buy the product/guide at hand.

THIS IS NOT SATURATED.

Simply because the guys app got copied & his earnings went down you think its saturated, your pathetic & really need to go back to your childish ways of earning money.

I have not made much from this, but I have not put effort in. This is my own issue, has nothing to do with saturation lol.

Stop commenting about saturation if you have no money or don't wish to buy the product/guide at hand.

Have some respect, and follow the forum rules!

For the record, I did buy the eBook (I've made the most so far too). I'm still making plenty but its because I change my apps regularly. I am just agreeing 100% with Tayax that this can get saturated which is starting to get noticeable

IMtense - July 15, 2014, 7:49 pm

If you guys take the time to think a little harder, you will find that the possibilities with the general method itself are endless.

You know I can't go into details, but understand you CAN change your approach on what you make. You don't have to follow his instructions 100%.

Try being unique, don't copy.

Do we have to register with another address (like where we live)?

If you for example use same .apk signing details or apk, or settings, or create with the same user that might have an outlook on it. He should also clear cookies, computer logs and get a new IP.

The reason why we are asking a new price to already existing customers is because someone have been selling our method and trying to leak it. A fox will also shoot you a message!

It is not against the rules to link a scam report on a sales thread, as long as the report is active and still going on. It has been decided that omfg was the victim and will be receiving a refund. omfg provided plentiful proof of being scammed, while OP of this thread merely told him to "stop fingering yourself" then claimed that it would be removed by staff.
