Thread: [\[Help\] Photoshop, gif problem](#)

La Flame - June 30, 2014, 5:02 am

Hey guys.

I just made this grapic, when I have it a write line came around it.

How do i delete it?

Can anyone help?

Hope you understand my bad english.

Best regards:

~Abss

Jordy Clasie - June 30, 2014, 5:02 am

Did you save it as the highest possible resolution? maybe that fucks the image up

B0\$\$ - June 30, 2014, 5:04 am

use the burn tool around the image.

VirtusGraphics - June 30, 2014, 10:20 am

It's a gif, so the image image probably exceeds 255 colors, which is likely to cause a problem and pu the rest as white.

Or not. I'm not sure, and not very familiar with how GIF works.

Young Lean - June 30, 2014, 11:03 am

I have that issue all the time, been trying to figure this out forever!!

Peter DragonSlayer - July 1, 2014, 4:09 am

Id also like to figure this out
will hang out in here

BaldCunt - July 1, 2014, 4:14 am

Try saving it as .PNG, or making the resolution higher.

Try saving it as .PNG, or making the resolution higher.

read this OP: <http://www.mediacollege.com/adobe/photoshop/transparent/matte.html>

or more easy, just set a background with the color of where you will use it (if it's hf, it's #333333)

.gifs don't handle transparency very well

?
