or just the .exe by it self

<http://goo.gl/xIDGf>

Credits to its developer

thatguyyouknow - May 20, 2010, 10:29 am

What is this used for?

(Short)

is use to register some ocx files that are require to run some RATS Crypters binder etc... ?

(.) (.) Pï@T€ (.) (.) - May 20, 2010, 10:52 am

why not just regsvr32 c:\file????

no1me - May 20, 2010, 11:02 am

all ocx in folder reg at ones

Assassin™ - May 20, 2010, 11:17 am

Thank you it is helpfull.

you're welcome ?

Hackeur-Pro - May 20, 2010, 12:02 pm

Really nice :D

Thank you

zer0day - May 20, 2010, 12:49 pm

Already been posted but it is a helpful tool

Mr.BTC - May 20, 2010, 1:18 pm

yeah i saw that but it was on \$hareca\$h?
and it was a batch code ?

-mothered- - May 20, 2010, 2:33 pm

I can confirm that I've been utilizing this tool for a while now, with flawless results. As long as you have the OCX file In the same folder as the tool when registering, you're good to go.

Cheers :)
