Thread: [\[YS\] Anaglyph Effect Tut \[EASY\]](#)

Mannibalector - June 30, 2014, 8:05 pm

This is the red&blue 3d effect, Google it if needed this is also very simple but effective.

Step one : take your image text or what ever you want "3d".

Step two : duplicate the layer by pressing CTRL+J or CMD+J.

Step three : double click the layer to bring up layer options.

Step four : on advanced blending untick Green and Blue then hit OK.

Step five : move the layer two to the right by using the arrows.

Step six : duplicate original layer then repeat but untick Green and Red this time and move left.

Step seven : test out with pictures to make the Anaglyph effect.

;O thanks for this. I'll be using this for future pictures text and add a earthquake like animation.

Skull. - July 2, 2014, 11:32 am

This is pretty legit I'll use this when I get home Thanks man!

Nice tutorial! Very simple! Thanks..

xVisioNz - July 11, 2014, 10:27 pm

Awesome, Thankyou, I will keep this in mind:)

mizo004 - *July 12, 2014, 8:40 pm*

thanks man for this

it's very easy :D

Sleekster - *July 19, 2014, 6:46 pm*

Thanks for this man! :))) will use it
