Thread: [worst booter/admins i ever used PHOENIX](#)

00o00 - July 1, 2014, 11:52 am

Hi guys just thought i would let you know that the phoenix booter is like attacking from your home IP (thats if your upload is around 50Mb/s) anymore and you will be doing a better job than this lame booter .

Anyways after trying it out and realising it couldn't even take out my home IP I asked for a refund and I got this message

ME Quote:ok i dont think this is working out can i have a refund or will i have to go down the pay pal disputes road ?

admin Quote:Power is the same as others. You can dispute the payment, however you will simply lose and your account will be terminated. We will also send your logs to your local police department, hopefully you chose not to attack anything that wasn't your property as you can face felony charges if you've decided to attack anyone else's IP maliciously.

O_o so you know not to trust this guy (lucky that I tested on my own server and home IP and neither timed out)

I gave it one last shot

Quote:Take 1\$ for your time and refund the rest and i wont escalate to a dispute, I cant say fairer than this , you offer trial for 1 day for 1\$ so this is a fair resolution to our situation I believe .

This was a week ago and he still has not responded (probably for the best) So I urge you all to avoid this booter if not for the severe lack of power then for the idiot admin who threatens you with the police

--_--

Anyway just thought I would share this so you dont have to go through the same waste of time and money =D

As for the best one I ever used I would recommend www.ipstresser.com It hits hard as promised and the admins are very good at what they do , they even extended my time when I had no internet, also they have daily limits so everyone gets what they pay for .

This really should be under the dispute part of the forums and if you want to warn people I'd recommend posting it on their thread rather than here. This section is mainly about creating and improving your own booter and botnet, not buying them from the marketplace.

Also, I'd recommend creating your own booter or botnet over buying one from the marketplace. It will allow you to control a private booter yourself rather than having to rely on someone else to keep their booter running/online.

Ahh ok thanks for that hopefully an admin can move it for me

And Ill look into doing my own I dont use them that often but every now and again they come in useful

just to update you guys he has now changed the name of the site <http://hfempire.net/login.php#> Empire Beta no doubt he will keep changing it, also have no access to my account so have been well an truly ripped off by this fraudster.
