Thread: [Need appraisal on Instagram Turbo'r Program.](#)

?Nyanbot - July 1, 2014, 4:18 pm

Few questions first, are there any working Turbo's left? And if so are they sold on HF? (couldn't find any).

And say I had created a program with a new method how much would it be worth for:

1 Week:
1 Month:
3 Months:
6 Months:
Lifetime:

b?xxy - July 1, 2014, 4:22 pm

If you created a working one,

1 Week: \$15.99
1 Month: \$24.99
3 Months: \$36.99
6 Months: \$59.99
Lifetime: \$99.99

I did the prices in my head, don't try to figure out the pattern xD

From the testing I've done it works and doesn't get locked out.

And I like those prices.

That's good that it works.

Also, I tried making the prices look like professional ones :P

Well if people want to pay those I have a few extra features I'd add in haha.

b?xxy - July 1, 2014, 4:39 pm

What sort of features are you talking about?
I'd like to know :o

Will message you.

Haven't used .NET in years, working on multithreading right now.

Would love it if other people commented some prices.

Alright, I'll be waiting for that message.
Thanks :D

No.
I would cut those prices in half.

Well if he has the only working turbo on the market then I would say the prices are fair

Kay - July 1, 2014, 5:58 pm

If this is the only working IG turbo, then yes, those prices are fair. However, I feel you would get more customers if you were to cut down the prices a tad bit. Like \$10-\$20. But that's for your deciding. Either way, I will most likely be purchasing if/when you release it.

?Nyanbot - July 1, 2014, 5:59 pm

Will be released today once I sort out the HWID.

Frost - July 1, 2014, 6:07 pm

I think BlackVeilBrides appraisal is fair.

However since this is the only public instagram turboer you could name your price.

?Nyanbot - July 1, 2014, 6:08 pm

(Jul 1, 2014 06:01 PM)K????? ????? Wrote: [\[CITE\]](#) I'll keep an eye out for the thread, that is if you plan on posting one ?

Will make a thread once I find someone to make a design and header image for the program.

Will be adding proxy support etc after a week or so of feedback.

Originalities - July 1, 2014, 8:32 pm

I knew someone would make this with proxy :p

good luck selling it, i'll be on the look out

You should make a vid of it of how it works.

?Nyanbot - July 1, 2014, 8:34 pm

Doesn't need proxy support to work at all. Just assumed some wont want to use their own IP.

I'm confused on how this turbo works. Can you explain me how it functions? or maybe a short quick video of how it's like.

?Nyanbot - July 1, 2014, 8:47 pm

Feel free to PM specific questions. Not going into details on the thread.

Carding - July 1, 2014, 8:50 pm

Those prices that BlackVeilBrides posted are perfect for this.

Pung0d - July 1, 2014, 8:51 pm

Yo that's sick.

For pricing i'd say

50 for lifetime,

BI?ckhat - July 2, 2014, 4:00 am

Sorry but what is an instagram turbo'er?

Diplomatic - July 2, 2014, 4:03 am

(Jul 2, 2014 04:00 AM)solkrush Wrote: [\[CITE\]](#) Sorry but what is an instagram turbo'er?
Application that "turbos" a username as soon as its available, good for snagging easy IGs with kids that trade often.

Hey now, my thread not his.

I'll be providing multiple account support so people can add a list of usernames to go for. But not till I see how this will effect my server that host's the bypass.

Bl?ckhat - July 2, 2014, 4:09 am

Hm ok, personally I wouldn't pay an outrageous price for it because it's not guaranteed that you get one

?Nyanbot - July 2, 2014, 4:10 am

(Jul 2, 2014 04:09 AM)solkrush Wrote: [\[CITE\]](#) Hm ok, personally I wouldn't pay an outrageous price for it because it's not guaranteed that you get one
No-one can guarantee that. No-one offers anything that can do this anymore. Instagram set request limits. I found a way around it.

Bl?ckhat - July 2, 2014, 4:13 am

(Jul 2, 2014 04:10 AM)?Nyanbot Wrote: [\[CITE\]](#) No-one can guarantee that. No-one offers anything that can do this anymore. Instagram set request limits. I found a way around it.
Alright I bet an OG salesman could pay a lot for it.

Good luck with sales

?nxy - July 2, 2014, 4:49 am

1 Week: \$8
1 Month:\$20
3 Months: \$ 35
6 Months: \$60
Lifetime: \$100

You found a proxy-less bypass for the request limit?

?Nyanbot - July 2, 2014, 5:25 am

(Jul 2, 2014 05:14 AM)Diplomatic Wrote: [\[CITE\]](#) You found a proxy-less bypass for the request limit? Not going into details. But I can handle around 400 instances running at 100ms refreshes.

Per server or? Hmm... Might be interested in investing in this.

Originalities - July 2, 2014, 5:42 am

I suggest putting a video so you can show people that your program will bypass instagrams limit. Would open up peoples eyes and stop questioning :p

?Nyanbot - July 2, 2014, 2:09 pm

(Jul 2, 2014 05:42 AM)Diplomatic Wrote: [\[CITE\]](#) Per server or? Hmm... Might be interested in investing in this.

In total I don't intend to ever hit 400 calls to my server every 100ms. No provider would like me. However if the server does takes too much load I'll add more.

(Jul 2, 2014 05:42 AM)Originalities Wrote: [\[CITE\]](#) I suggest putting a video so you can show people that your program will bypass instagrams limit.

There will be a video and 3 day vouch copies given away. Got called into my real life job and have to do two days work there.

?Nyanbot - July 3, 2014, 4:12 pm

I've replicated the load of 5-10 users running this with my server to bypass the request limit and its not practical. The average load time was between 2-5 seconds for 5-10 users active.

Simply not going to be efficient unless I run multiple servers and like 10 threads in the app. Will explore other options.
