Thread: [The best font website I Amazing fonts I Free I Not Dafont](#)

Tahh - July 2, 2014, 12:57 am

Browsing Google for some fonts and I came across this website for fonts, I have never seen it mentioned before nor anyone speak about it, On first view it looks like you have to pay for them, no you don't; you put 0 in the donation box click download and your download begins.

They are real good fonts on there, better than dafont, dafont may have more but not as good as these.

Been posted before. Nonetheless, it is a great group of fonts. And they are created by professionals too ?

You pay for a licence to use this font, the \$0 Donation will just download it for personal use.
