"no one can crack" - everything is crackable, it depends on the time you put into it ;)

false advertising.
theres no app that 'can't get cracked'
depends on whos REing it and how much time they put into it

iDarky - May 21, 2010, 9:17 am

h3llboy will crack your apps with ease :)

i gotta say +1 to that
h3llboy is insane

Webhouse - May 21, 2010, 9:23 am

Could you explain what methods are used to protect an application?

amx93 - May 21, 2010, 9:30 am

They use public shit ?

Hli4S - May 22, 2010, 6:32 am

Guys first all h3llboy couldn't crack one simple file crackme.exe with one line code i have send to him before 3 days to test if my team have a good protection...
Second Yes i know that everything sometime can be cracked but to crack my teams protection is not so easy than the others...
And third the methods we use is a compination of public and private apps to have a very good result with very powerfull protection....

if you don't believe me ask the h3llboy then they have past 3 days to crack a simple file crackme.exe with only one line code....

and sto spamming my thread
