I have to say good job, it looks very nice but I have 2 questions:
Does this work with PPI ?
Is it FUD ?

I have never tested this with PPI.

I will PM you both in an hour or so after I have tested it.

I'd love to see how it goes. You have a great locker here to be honest. Good luck with sales. :)

This won;t work with PPI unfortunately, Survey lockers are for surveys :)

If you want to use PPI I suggest taking a look at Forever RAT, which is linked in the OT.
