Thread: [Filenuke link grabber](#)

tmk1337 - July 2, 2014, 10:04 am

Hello,

Im trying to get the video-url from Filenuke.

I am succesfully receiving the link, however when i want to play the url with a other object then the webclient (VLC, Mediaplayer or whatever) it isnt working.

Somebody can help me with this ?

Thanks in advanced.

tmk1337 - July 2, 2014, 10:12 am

Yes, its working for all other filehosting websites, only filenuke seems to be a problem.

tmk1337 - July 2, 2014, 10:25 am

It just doesnt play the video, even when i paste the link in chrome it seems dead, but i dont see the reason for it.

If i manually grab the link from source code, it just works fine.. so it seems not to be VLC related.

tmk1337 - July 2, 2014, 10:48 am

See first post for source :) edited to sample for problem link

Code Dim Webgrabber As New WebClient

Webgrabber.Headers.Add("User-Agent", "Mozilla/5.0 (Windows NT 6.2; WOW64)

AppleWebKit/537.36 (KHTML, like Gecko) Chrome/35.0.1916")

Webgrabber.Headers.Add("Referer", Link)

Dim reqparm As New Specialized.NameValueCollection

reqparm.Add("method_free", "Free")

dim Link as string = "http://filenuke.com/k7hmkr9vgqhb"

Dim dresponsebytes = Webgrabber.UploadValues(Link, "POST", reqparm)

Dim dBronpagina As String = (New Text.UTF8Encoding).GetString(dresponsebytes)

dBronpagina = Split(Split(dBronpagina, "var lnk1 = ")(1, "";"(0) & Split(Split(dBronpagina, "var ext1 = ")(1, "";"(0)

Clipboard.SetText(dBronpagina)
