Anyone knows what dollarboot is? I think they just got retired / shut down. Well, does anybody know a online/website booter that is as good as Dollarboot? Or a booter that can take down more that just a css server? Thanks for serious answers!?

Do you know if it is very hard or easy to make a botnet? :) and how i should do it?

Well just bare in mind that all that is illegal, so you must be willing to do the time if things go bad. If you accept that liability then google it up. It's not difficult to make a botnet or DDoSer.
