Thread: [Rate My Sig/Avatar \[First Sig\]](#)

First time I've tried creating my own signature. I've done a lot of GFX before just not a whole lot of signatures. What do you guys think? I like how it's simple.

Also I created my avatar, what do you guys think of it?

I like the font and how simple it is! Professional and easy on the eyes! Not bad imo

Simplistic stuff turns me on... And this sir, gave me an erection strong enough to cut off Ned Starks head.

The only thing I would do is use a clipping mask on the text from like the mountain range part.

I would blur the lower part of the trees and then blur directly around them to draw attention to the trees and the mountain to create some nice depth.

I'll try that, thanks for the input buddy!

Use don't like the font used in your signature, neither do I like the colour.

I recommend the font "Wolf in the city" and the colour to be white with 90% opacity.

Really awesome. What i think would give it that extra "thing", is instead of just putting "Photos" in the sig, put something like "Photos - Some long slang, that makes it look great." of course, without bold, and maybe italic.

Name of that font, please?

Thanks in advance..

Cool photo, did you take it?

noise and text ruins it though

This. Even leaving the text white would be an improvement, it doesn't blend right.
