Thread: [\[Brand New\] Visual Studio Theme by Earn \[Get It Now!\]](#)

Earn - July 3, 2014, 1:51 pm

Hello everyone! This is Earn here & I am here to bring you my newest theme, the Visual Studio Theme. This theme is based off of the Dark Visual Studio theme available in Visual Studio 2012 & 2013.

Image

What does this theme include?

- Textbox
- Progress Bar
- Group Box
- Check Box
- Radio Button
- Control Box
- More to come soon!

Download

[Click Here!](#)

Credits

- Earn (Creator of the theme)
- AeonHack (Amazing themebase)
- Mavamaarten~ (Video Tutorials)

Please leave your opinions of the theme below & what I should do to improve it. Thanks!

(Jul 3, 2014 02:10 PM)Sabre Wrote: [\[CITE\]](#) It reminds me of this theme:

<https://hackforums.net/showthread.php?tid=3945302>

The color scheme is cool though.

Thanks for replying man. Means a lot. :)

LordCoder - July 3, 2014, 2:53 pm

Hmm looking nice :) Thanks for sharing.

\$lick - July 3, 2014, 3:18 pm

Nice theme, We need more flat themes like this. (The the overused flat theme though, That shit is getting old)

Earn - July 4, 2014, 4:52 am

I didn't get the design from AeonHack. I was inspired by the Visual Studio Dark theme.

iSynthesis - July 4, 2014, 11:45 am

I mean a good one like this, Also the win8 theme is a great flat one.

I dislike themes like iSynthesis' one.

(Jul 4, 2014 11:45 AM)iSynthesis Wrote: [\[CITE\]](#) Aeon didn't make Flat UI theme, I did, just saying..
The amount of times people have said AeonHack made that theme is ridiculous.

Dr41DeY - July 4, 2014, 12:57 pm

This theme looks awesome! :)
I will be using this for a couple of my programs.

Cammy - July 4, 2014, 1:02 pm

(Jul 4, 2014 11:52 AM)balram Wrote: [\[CITE\]](#) nice share its looks boss :)

fwafa,pfmapgapgmpampapgmagag

I don't see why you wrote the random shit in the end. You could've just said "keep it up man" or something like that :P

As for the theme nice work! I bookmarked this ?

Sn0wX - July 4, 2014, 1:04 pm

Iv never commented on a theme thread. They all ways seem to mention aeon. So what part did you write or just change color values?

Earn - July 4, 2014, 10:45 pm

He made the themebase. It makes it easier to make themes & shit. I made the theme, he just made the themebase.

Nextrum - July 5, 2014, 5:18 am

I like the general look at yours, it looks quite nice and clean. Little bits and bobs need working on though like the text colour. Here's mine that I stopped working on a while ago :)

Earn - July 5, 2014, 6:35 am

Thanks man. I will try to make the theme perfect & shit.

Also, yours looks pretty good bro!

Ajumma - July 5, 2014, 2:15 pm

Finally a theme that comes with a textbox...even though it doesn't have many controls. Other themes seems to forget about textbox lol.

Sn0wX - July 5, 2014, 2:18 pm

Ok so i say again. What part did you write.

Transporter007 - July 5, 2014, 2:37 pm

looks good i will use it on my new project soon.

OffCode - July 5, 2014, 3:45 pm

This looks pretty nice! Thanks man!

Earn - July 6, 2014, 1:18 am

(Jul 5, 2014 02:18 PM)Sn0wX Wrote: [\[CITE\]](#) Ok so i say again. What part did you write. You obviously don't know much about Vb.net. Lmfao...

Sn0wX - July 6, 2014, 4:50 am

Na i know nothing. Since i know nothing please paste here the lines you wrote, or can't you paste the lines you did.

Check the source. I wrote everything that is not in the Themebase.

Chump - July 6, 2014, 9:36 am

Wow that theme looks amazing ?

Sn0wX - July 6, 2014, 9:45 am

Ok so let's approach this from a different angle. A few question's i'd like you to answer. Being new i am confused. Private fields. Some start with an upper case. Some start with a _ some are fully capitalized constants, some are named, some are named with 2 letters declared on a single line, some are even declared with the default class level scope DIM. Thats 7 different ways of declaring the same level variable. Why? No programmer randomly changes his style. This says to me you have no idea about basic variables. Moving on.

Some Boolean If expressions are inclosed in parenthesize, while others are not. Why? Why would you yet again change your style. Some If statements are forced single line while others gracefully expand over multiple lines. Why yet again?

You can write all that yet never learned Booleans what are taught in lesson One? You use Two variables for the same expression yet worse use an if statement to compare it's value. it simple is Me.Checked = Not Me._checked, never compare booleans to true or false.

Declaring a property readonly while using set? Property [ReadOnly]() As Boolean, oh wait now your using the extra un needed noise TRUE, FALSE Code If _Checked = True Then _Checked = False Else _Checked = True why are you suddenly writting =true, or =false? Just below it your not :/

Summery, stop googling code. It's not programming.

TheBarret - July 6, 2014, 9:52 am

I know Snowx can be an ass, but he does have a point, matter fact i actually stand behind his logic of your so called failure program. You failed. end of story.

\$lick - July 6, 2014, 10:33 am

I second this.

Even though I don't see it as a failure.

Earn - July 6, 2014, 11:36 pm

Please show how the program (rather a theme) is a "failure". Does the theme work? If it does, I cannot see how it is a failure.

You aren't going to patch a hole in a yacht with duct tape, are you?

>But it still works!

gtfo

Sn0wX - July 7, 2014, 9:36 am

Earns only comment was Negative (-3): LQ Member. By passed all my questions which are obvious random googled methods. I proved my point by asking simple questions in a calm and friend manor. You can say what you like about me, close the thread. Get me warned what ever. You failed to answer now every One has seen you are not an actually programmer of any level :)

SIM-1676753 - July 7, 2014, 9:44 am

Snow knows his stuff. You should listen to him a bit, excluding the "failure" part.

Earn - July 7, 2014, 10:53 pm

I can't be fucked arguing. Either use the theme or fuck off. No one is forcing you to use it.

Freddy K. - July 9, 2014, 8:39 pm

TY For sharing, +1 rating for you!

Im going to use this theme in my next product if you dont mind,
