I could also help you out with this service if needed.

I'm pretty much always available and easy to talk to.

Good luck with the service mate.

Peace <3

The Sly - July 4, 2014, 3:03 pm

This is extremely nice of you! ^^ I hope people will take advantage of this. Not everyone has somebody to talk to.

This thread is very generous of you. Going to PM you.

R?DSPY - July 4, 2014, 3:12 pm

This is very nice. But I would rather keep my depression thoughts to myself, I explode when I talk about my depression.

Time to put on a mask.

wellager - July 4, 2014, 3:29 pm

I don't use my sig so I might be useful for once, gonna link to this thread

See, the issue with keeping all thoughts of depression closed in you is that they will eat at you. I would recommend expressing your emotions in one way or another, whether it is talking to someone or writing music, I would recommend doing it.

-Elicit- - July 4, 2014, 4:37 pm

I'd be glad to play a part in this also. I want to help those that's going thru these things. I'm free. You guys can Skype me or even pm me. My Skype is elicitgh. Always good to lend a helping hand.

Thank you very much for this service

Zabuza? - July 4, 2014, 6:59 pm

For some reason this thread was moved to innuendo so the thread won't work... I'll try to sort this out soon.

Prophet Banana - July 4, 2014, 7:14 pm

I don't know who designed that thread design but it's utter shit. Learn how to choose a legible typeface and how to properly kern text. I can barely read a god damn thing.

Bro, i can read this just fine... He is here to offer a really nice service, not to showoff his graphics

skills. That comment would of been better if you added at the end, "I will help you create a better one".

Anyways, cool service! Everyone needs a friend.

Vouch for ceoff, I was on the point of suicide onetime and he helped me through it. :3

I Love Baseball - July 4, 2014, 9:06 pm

Guys suicide isn't a joke, this is a hacking forum, not a pussy convention.

ZXshockaXZ - July 4, 2014, 9:09 pm

I love you, man :)

This is wonderful. I hope people hit you up. I'll go ahead and offer my self to anyone that needs to talk as well.

Burritos - July 4, 2014, 9:11 pm

Obli - July 4, 2014, 10:05 pm

As Prophet Banana said, the layout isn't that easy on the eyes, but you have my respect for doing this.

Intellectus - July 9, 2014, 2:39 pm

This is a good thread - which is why it should stay alive, really. However, the font was too hard to read :(

Agreed. A different typeface or filling it in with a different color (white?) would have made it more legible.

GoldenStarSticker - July 9, 2014, 3:20 pm

Lmao everyone ignores me and although im sure I say something right and my tone is normal, people just cut me off A LOT. I feel like eevryone lost respect for me and this increases my anxiety and insecurities... I promise you my breath odor is not bad compared to other people (not to be rude but this is directed towards to mean people) and I was also expelled from school for telling people how I felt, it wasn't vulgar or vile or anything, they all assumed il did it for attention (which isn't true) tythey called me heartless and all sorts of mean things and kept me in school til nighttight until I my mom came (and she doesn't even live close) I am also called yo be an ugly person and I fail a lot in shool yet I plan on skipping a grade.. i still believe i can but no one else does.. i truly think this will be ignored like usual but atleast some people see the qualities in me like being humorous i guess? I just think the princibal is evil in my school and that they're pushing me to the edge because they

think i deserve it when i went through so much :((((I really do wish someone could help.. Lmao I'm so desperate im posting in a hack forum >.< And no my parents do not listen to me :(Im also on government watch which is why i want to learn how to hack AND get respect from the internet communtty, it would do a lot.. oh and I need some cash so hacking is something ill use for that specially but I don't think I have enough disk space for a bunch of pdf's and ebooks or whatever.. Please please notice this and help a newbie out :(

Trifecta - July 9, 2014, 3:55 pm

GottaObey - July 11, 2014, 6:03 pm

Hentia - July 22, 2014, 4:58 am

Very neat service you are providing Op

Oghma - July 22, 2014, 6:03 am

THis is an amazing service in my opinion and you want to help people, i know your intentions are good,But since you don't got any certification on psychology or related, it's not the best thing to do.YOU might give a false advice to some one and do something wrong.Police will find out to whom he talked to and will sue you if not arresting you.YOU should just stay on smaller topic of just what is going wrong or a friendly talk.NOT dealing with depression and other illness.It is a really dangerous path for every one.

I would not be held responsible for attempting to talk someone out of suicide. I am talking to people and letting them lean on me when they need it. Don't be so ignorant.

Gargarya - July 25, 2014, 10:58 pm

This needs to be a bigger thing with its own website and team of people.

Thanks OP, you're making the world a better place.
