Thread: [What Does Your Desktop Look Like? | Post a Picture of Your Desktop](#)

24K. - July 5, 2014, 4:32 am

I just wanted to make a thread for everyone to share what their desktops looked like just for the sake of curiosity. I personally customize the shit out of my devices, and I'm not sure if that's common or not. Go ahead and post a screenshot of your desktop if you have a dope ass one, I'm sure some people would be interested. In case you don't know how just press Ctrl + Alt + PrntScr, this will copy your screen to your clipboard then you can paste it into paint by pressing Ctrl + V.

Here's mine:Spoiler [\(Click to View\)](#)

Also, if anyone needs any help or has any questions on desktop customization free feel to PM me. ?
