Thread: [\[Looking for\] Instagram private viewer](#)

MrJulma - July 6, 2014, 9:03 am

Hi, couple days ago i downloaded app called "Intramap" (It shows instagram photos on map loaded near you.) to my phone. I noticed that it show`s private profiles too so is there any program on PC where you can view private profiles.

Thanks!

Download the app with bluestacks and you can run it on your computer ;)

Mnikkilla - July 27, 2014, 3:38 pm

Bluestacks can be downloaded here: <http://www.bluestacks.com/>

It is an android emulator, so basically a virtual android phone running from your computer
