Thread: [FREE forum signatures/banners \(l33ts/ub3rs only\)](#)

LoweredLifestyle - July 7, 2014, 12:37 am

making forum signatures and banners for products, clans, or whatever you need for free, I'm still new to making gfx but hoping to get some decent ones done for you guys and improve to open a shop one day.

only making for l33t and ub3rs as they are only one's who can have images in signatures. I'm still new at making GFXs but I thought I'd still give it a shot at making a small shop for a little extra cash.

tell me what you want, color theme, text and whatelse you would like.

some of my work:

Honestly bro your Graphics need a lot of work, you seem to have stretched a lot of the images, the text is LQ, there's waaay too many flares and honestly everything looks like it was done in paint.

I never said they were terrible :P I was giving him some constructive criticism so he knows what to improve on in the future.

Thanks! I'm still trying to improve and yeah text is something I really struggle with. But I need some extra cash so i thought I'd do some free stuff until i can post back into marketplace with better gfxs
