Thread: [\[Free Spammer\]\[Scan Included\] Aqua Chat Spammer \(Skype, IRC, Enjin, Facebook\)](#)

Domanate - July 7, 2014, 4:55 am

Hey Everyone,

My name is Domanate and I have been on HF for a few months. I decided to make something compact and fun to mess with people, I have made many different programs in the past that include various types of spammers with skype, Enjin and Live chat plugins / Widgets on sites. I Decided to put a lower end version of what I make and see how you guys like it. I Will be including more so dont think this is it. In update 1.5 it will have 2 Types of Resolvers - Yahoo Avatar Stealer - ISP Look up Built in and many more! Please make sure to View my Legit proof showing how clean it is and if anyone needs more proof ask and I will upload snips of the code on pastebin!

Thank you very much!

Ps. I did not make this Theme I got it off of some other guy who gave it to me.

~Enjoy :) p.s I know its slower to spam, I will have it spam faster when I get to 1.5, it is just in its baby steps currently :) Custom Spam rates will be included too in the next update!

Thank You Everyone for the feedback! :) I am working on a Larger Version 2 of this program! Resolvers will be added, So please ensure to come back when V2 is finished!! :D

The User on HF By the id: 1769039 is a complete prick. He purposely Downed my Rep for the sense of putting down someone else.
