Thread: [Looking for good hack maker/coder |GOOD PAY.](#)

Spratty - July 8, 2014, 5:14 pm

Hello,

I'm looking for an coder to recode a program/code a new program that will be called hacks for the game "Endless-Online" A small mmorpg game that only has about 150 people on a day now.

It patched the program Xspeed which was used to "speed" or move fast on this game called endless-online.

I'm not too sure if anyone will know how to do this, or the hardness of it, but if someone can code a program that gets past the security to "speed" again or go really fast, I will pay good.

Program must work on Windows 7.

I will link the game/hack speeding program below. If anyone has any questions let me know.

THE GAME:<http://endless-online.com/>

How to set up speed with the game (also shows in game footage of the speed):<http://www.youtube.com/watch?v=U-5JEinBwd8>

The program (hack) is called Xspeedpro

Any questions let me know, idk if this is possible but i'm reaching out to you guys.
