Here's an idea I think you should consider:

Make a mode for the auto soup to make it drop soups instead of stacking after eaten. Maybe make the command like .autosoup mode drop & if you wanna change it back, the command should be .autosoup mode stack.

Hope you like the idea.

I'd like to say I'm glad to see this updated, but I can't fucking use it.

All the servers I get on are 1.7.2-1.7.5, and Xenon is default 1.7.10

Hey Ownage, I got 2 perfect Suggestions to make this the absolute best client hands down...

1. Add either NEI or TMI so as to semi automate crafting.... or add a auto crafting system, and for the love of god don't say weepshit has it. theirs is broken / is vip only and still doesn't work even if

you donate.

2. Add optifine

Optifine will make it worse.

I would request the mods VoxelMap, it's a very handy map and you can see players on the minimap it has some extra shit too so you might want to check it out, if you can toggle it so you have like statushud, armourhud, voxelmap and you do .vanilla and they stay it would be amazing since i want to hack sometimes and play legit sometimes, it's bothersome to first quit minecraft, start minecraft up, click on forge profile, start up, minecraft will crash 1/2 times, then works you get the point, would there be a way for the mods to be still active in .vanilla

You obviously haven't played on a server where you obtain large amounts of coal / redstone / lapis so on. its nice to not have to make redstone blocks, coal blocks, so on... its tedious to have to click and move each stack to the table when i can click redstone block, shift click ?, and have it pre-fill the crafting table for me.

as well as i am sure most users would appreciate this being added. as for optifine, meh. its just nice to have the zoom + 32 chunk load occasionally.

Are you using this on a multiplayer server or on singleplayer?

In case you're playing on a SMP server, NoCheat+ might be blocking you.

I am using it on an SMP server, and I think it is NCP+ that's blocking me.

Flare is having this issue too atm. I haven't checked yet, but it seems to be caused by not using MCP's reobfuscate.bat and trying to compile it with eclipse or using the bin. Let me know if this isn't the case.

The Kill Aura already makes you look in the direction of where you are hitting. (In NoCheat mode at least) and if you're really worried you can use Triggerbot or Saftey.

That is a disappointment indeed. :(Are you any good at coding Chris? If you are or know anyone who could make me a xenon styled client for 1.8, I'm willing to pay \$50 (CAD). All I want on it is fullbright, kill aura, criticals, chest ESP, sprint, tracer, autowalk, dolphin, autotool, freecam and flight. I just love the GUI of xenon and the alt manager ETC ETC and can't stand other clients. Let me know.

Thanks,
