Toxic Asshole - May 21, 2010, 11:27 am

Cybergate 1.0.4 And 10.4.8 Tutorial

[:: | By Toxic | ::]

* I recomend you watch this on youtube itself because the video is in the full resolution in 1280x720 In HD here Its displayed 640x420

Note I just uploaded these so the quality is getter better per minute ! *

Part 1 : http://www.youtube.com/watch?v=ARsFQ1U_8hM

Part 2 : <http://www.youtube.com/watch?v=JR8BqCDGyVA>

Go Ahead And DoS Me If You Want I Changed My Ip ? I made the videos ub3r n00b friendly ! I edited very carefully I took my time please take your time and say thanks!

Gates - May 21, 2010, 11:29 am

Literally watched them as you posted them. Thanks again! Helped with view count a lil.

Beck - May 21, 2010, 4:04 pm

Awesome video, Toxic, I am sure it will help most people around here to set-up Cybergate :)

Toxic Asshole - May 21, 2010, 4:04 pm

(May 21, 2010 03:57 PM)ap1007 Wrote: [\[CITE\]](#) man, how do you get other people infected? do they download your server link and run it? because i tried it on another of my computers and the antivirus picked it up -_-

Thats why you need a crypter a crypter makes your file fully undetected and invisible to antivirusus.

(May 21, 2010 04:04 PM)Beck Wrote: [\[CITE\]](#) Awesome video, Toxic, I am sure it will help most people around here to set-up Cybergate :)
Thanks man :D

bump bump it to the top w00t w00t.

grimm70 - May 22, 2010, 5:32 pm

Nice tut.

But its not recomendado to install server in System in vista/7 bcoz privilage rights.

And if you tick all 4 Boot options then you will get more firewall alert.

And don't install server as server.exe.

Toxic Asshole - May 22, 2010, 5:33 pm

doesntmatterz - June 3, 2010, 5:52 pm

Awesome tutorial. I am using Albertinos but I cant get it to work, so I watched your tut in hopes of it
getting me situated on what might be wrong on Albertinos rat and I discovered my ports wont open.
Only after disabling my firewall in both norton and my linksys router did my ports finally open. I
followed your cybergate tut step by step and created the server.exe from cybergate and ran it on my
main computer, but lo and behold I dont show up.... I dont know why. Im on windows 7 64 bit

Toxic Asshole - June 3, 2010, 8:02 pm

ok,maybe it's better like that, I'll try it.

I'm having another problem, I opened file on my roomie's computer,and when I open cybergate like told in tutorial, I can't see the server.

I disabled my antivirus and firewall and my roomie's antivirus when I opened file on his comp.

What might be the problem?

thanks

Toxic Asshole - June 7, 2010, 4:53 pm

Port forwarding or you dont have No-IP open. Or your roomies computers av is on.

Only possible acusations.

Ben.8354 - June 7, 2010, 5:08 pm

Hey im new here too XD

Can you tell me how i can have the program on my computer without it being deleted by Norton all te time?!? it is really annyoning cuz i disable but then when it comes back on it automatically deletes it?

Thanks and great tutorial ?

topolino - June 7, 2010, 6:11 pm

(Jun 7, 2010 04:53 PM)To?ic Wrote: [\[CITE\]](#) Port forwarding or you dont have No-IP open. Or your roomies computers av is on.

Your welcome man good luck ratting people ;P

skitty135 - June 9, 2010, 7:16 pm

I still need to learn how to port forward.

I've been away for a while and decided to come back so now I forgot everything. ?

Thanks dued just trying to help out the fellow HF members here.

Toxic Asshole - June 12, 2010, 4:08 pm

bump :) FOr the best cybergate tutorial :P

sv650_pimpin - June 12, 2010, 4:53 pm

haha! I am on a aircard (same as LAN). I am gonna try it and see if it can get it to work. I bet I can though since yours says the same as mine on canyouseeme.org

Yup It should work dued.

< to short >

sv650_pimpin - June 12, 2010, 5:41 pm

FYI (not to get off subject, or thread jacking) , I have a few loggers going (over 50) and how i spread them was I went to yahoo chat and just did the send file option. 25/100 accept it. Then you know the rest....

I have another question... I tested it by infecting myself. If I show up, then other servers should right?

Way off topic LOL not for this thread ask someone else.

Toxic Asshole - June 12, 2010, 10:44 pm

Cybergate 1.0.5.1 tutorial out !

No problem thats why I am here ;D

camoman - June 15, 2010, 11:53 pm

Great tut Toxic..I am having an issue with my server showing up it has been a couple hours and it did not show up as fast as yours..This was happening to my Cerberus servers thats why i switched to Cybergate..What do you think it could be?..BTW

My servers are not FUD

I have no AV running

No-IP is updated

One thing is that my IP is showing 192.168.1.43 instead of my LAN IP but it still updates

[2:52:49 AM] Success : DNS Hostname Update Successful

I dunno..

Alright m8 I'll list some possible things that can be happening and answer your question...

1) if it's showing that IP instead of your LAN IP it's okay because your on a router and you need to port forward port 82 on that IP that could be why your not showing up port forwarding.

2) Turn off your firewall and all AVS (Including Windows Defender if your on Windows Vista or Windows 7)

Ok thanks..I am using XP....Port 82 can be seen in canyouseeme.org..all AV's are off

My port forwarding is thru Verizon DSL W37 router maybe they suck or something..lol

I'll keep trying

Yeah including firewall.. I think the router is not forwarding right or something..I just got help thru Teamviewer thru Luke who was awesome..and we did everything..DMZ..Static Nat..changed hostname thru no-ip...created diff ones...the conclusion was i need another router maybe Sky or Dlink...

Toxic Asshole - June 16, 2010, 8:46 am

It could be a possibility my friend has verizon took him 3 months to figure out how to get his port forwarded it said it was on canyouseeme but its not.
