Hi. I don't know the rate of exploit because I don't use one. You must have an exploit pack on your website and it really depends on your exploit how well is performing. I only guarantee the hits to your website , real people with unique IP addresses (no proxy,no spam,you can check all the IP`s and see they are 100% legit).

If you meant something else and I didn't get it , feel free to tell me.
Going to sleep now , 2AM in Romania :) , will check this thread tomorrow when I wake up. ?
