This is my first Thread Design which in my opinion could be much better.

Things to fix:

1. Text on titles being different sizes
2. Better font/edit choice

I know it is your first but this doesn't look good at all, sorry to be harsh but its the truth. That text is horrible, the boxes are really bad, It is low quality and some of the images are low quality. Have a look at other peoples threads and try to make this a "Flat" Thread design or something along those lines.

This 'design' is literally a few pictures stiched together with a few boxes and some text. There's nothing unique or appealing about it.

The pictures don't even go well together.

dude you need only one long picture for background.
we'll do something with the boxes
