Thread: [How to Get Kik with Out BlueStacks and Android Phone?](#)

luxor84 - July 11, 2014, 10:53 pm

Sorry if it seems like I'm spamming.

I don't have an Android phone, which means that I don't have a Google Account with a device id.

Is there a work around for people with iPhones??

You can use BlueStacks and make a Google Account. It makes you make a "Google Account" when you download BlueStacks anyways unless you already have one you can just sign in.
