** If you are able to read this then my Paid Mentoring Thread is currently down. Add me on skype: v3n0m1t3s to discuss personal mentoring ****

R?R - July 12, 2014, 11:22 pm

Okay so basicaly im using Razorcrypt 2.0 and Dark Comet. Recently I restarted my computer and for whatever reason windows defender deleted my DC and I lost my slaves.. I was told that there was a way to retrieve them but for the life of me I can't figure out how to do it. When I make a stub in DC and run it with sandboxie I pop up as a user... as soon as I go to encrypt it and run it with sandboxie nothing pops up, almost as if the crypter was corrupting my stub (Razor assures me that it isn't the case).. When I make the stub is use MINIMAL settings on the full editor, (only my DNS/port forwarding) I've tried crypting in native and 2.0 and I tried with and without injection here are my Crypter settings <https://gyazo.com/253c568a414d355ccb9beb2a59e3cc4f>
<https://gyazo.com/79c1b748d07ec3e0ff9dbca6e9ca5897>
<https://gyazo.com/65355b989e67e345bc7e8ea860c06286>

If someone could help me get my slaves back I'd be forever greatful.. (and if your patient, next friday I'd be willing to send you 5\$ via paypal)
this is what I used for my DNS
<http://freedns.afraid.org/>

5 Cents - July 12, 2014, 11:32 pm

I was wondering if you'd be able to give me some test installs, and maybe a crypt aswell?
I have skype: fivecentshf

PageMaster - July 12, 2014, 11:40 pm

Augeson Add me on Skype V3n0m1t3s and send me a test stub. and we can trouble shoot from there.

5 Cents, Give me 5 minutes to review your account. If I add you on skype I will be doing a test install If not then It means i probably wont be, and you need to get your activity up, and start contributing some stuff to HF.

Bin4ry - July 14, 2014, 9:15 am

I can vouch for this Service.

Regards,
Bin4ry

IFunBox - July 14, 2014, 9:19 am

I would like a full set up please,my skype is lloveboxes23 thanks. And am using a VPN and Have my port forward already.

Cerciz.Nder.Maja - July 14, 2014, 9:34 am

My question is, can a RAT be bind to a song, for example: Tiesto - Adagio For Strings.mp3 and the file that is infect to look like that: Tiesto - Adagio For Strings.mp3 without any .exe in the file name

NestiALB - July 14, 2014, 9:38 am

Port forward question

I am using proxpn VPN Whenn i try to see if they are opened in canyouseeme it keeps saying Error: I could not see your service on 173.0.8.104 on port (1604) ... That error is for all ports that i have tried . I have tried around 50 ports and for all keeps saying that. PLease i need help ?

LOLdropper - July 14, 2014, 9:50 am

Seems many RAT Helpdesks Growing These Days.Anyways Good Luck With It OP.

roben81 - July 14, 2014, 9:56 am

i have problem with portforward.

MY no-ip was disabled so i go here <http://freedns.afraid.org/>.

- 1)i run the bat file
- 2)i set the unencrypted server but it run only in msconfing not to the interface of the rat
- 3)i crypt the server and i try to run it but nothing show up.

What i am doing wrong?

port is open and firewall/av disabled

The Line of Death - July 14, 2014, 10:24 am

could be the dns provider.

It's proved to work with dyndns. however you will need to buy a dns solution. 20 dollar a year or something

PageMaster - July 14, 2014, 10:36 am

and the file that is infect to look like that: Tiesto - Adagio For Strings.mp3 without any .exe in the file name

Yes a RAT could be binded to a Song, Ive seen them also binded to things like PNG's and GIF's. You just have to find a capable binder, and then hope that is compatible with your RAT of choice.

(Jul 14, 2014 09:38 AM)NestiALB Wrote: [\[CITE\]](#) Port forward question

<https://i.imgur.com/6Evr93W.png> <- IMAGE

Most Likely the Port is closed. try Whatsmyip.com and use their port scanner tool to ensure that the port is open.

The easiest VPN I ahve found for Ratting is ibVPN, its \$3 a month and you are assigned a dynamic IP and It works with No-ip DUC, and DynDNS.

(Jul 14, 2014 10:24 AM)The Line of Death Wrote: [\[CITE\]](#) could be the dns provider. It's proved to work with dyndns. however you will need to buy a dns solution. 20 dollar a year or something

IT most likely is the DNS Provider, I checked it out, and it did not seem to be of too high quality. I second the reccomendation for dyndns.

Another Option would be ibVpn which gives you a dynamic IP and keeps no logs. You wouldnt have to worry about port forwarding, and its very easy to use! Or nVpn!

Preperition - July 14, 2014, 11:02 am

Vouch for this guy he is legitimate he helped me set up my rat and gave me some tips on spreading!

Cerciz.Nder.Maja - July 14, 2014, 11:18 am

So there will not be at all a .exe in the title of the file?

i was told that even with binding the .exe will show on the tile

Llyn - July 14, 2014, 11:20 am

(Jul 14, 2014 11:18 AM)Cerciz.Nder.Maja Wrote: [\[CITE\]](#) So there will not be at all a .exe in the title of the file?

i was told that even with binding the .exe will show on the tile

Yes there will be an exe in the filename no matter what. Unless you have a file spoofer , however the filename would look like this " songnameexe.mp3" . Correct if I am wrong though.

brad9999 - July 14, 2014, 11:24 am

(Jul 14, 2014 11:20 AM)Llyn Wrote: [\[CITE\]](#) Yes there will be an exe in the filename no matter what. Unless you have a file spoofer , however the filename would look like this " songnameexe.mp3" . Correct if I am wrong though.

You could change it to .scr and it will appear as songnamersc.mp3

Cerciz.Nder.Maja - July 14, 2014, 11:25 am

(Jul 14, 2014 11:20 AM)Llyn Wrote: [\[CITE\]](#) Yes there will be an exe in the filename no matter what. Unless you have a file spoofer , however the filename would look like this " songnameexe.mp3" . Correct if I am wrong though.

so even with a file spoofer the exe will be in the name?

IFunBox - July 14, 2014, 11:26 am

Vouch for this guy right here,knows what he is doing.

Llyn - July 14, 2014, 11:28 am

(Jul 14, 2014 11:25 AM)Cerciz.Nder.Maja Wrote: [\[CITE\]](#) so even with a file spoofer the exe will be in the name?

Yea from my experiences with file spoofers anyways. The only thing they do is move to exe right before the ext type. So in your example it would be Adagio For Stringsexe.mp3/ Adagio For Stringssrc.mp3 .

Cerciz.Nder.Maja - July 14, 2014, 11:32 am

thank you for the clarification, sucks though that the exe has to be there : /

Llyn - July 14, 2014, 11:34 am

(Jul 14, 2014 11:32 AM)Cerciz.Nder.Maja Wrote: [\[CITE\]](#) thank you for the clarification, sucks though that the exe has to be there : /

Trust me in the end it doesn't really matter that much. A lot of idiots will still fall for it. Also as Brad stated earlier it can also be changed to src instead of the exe.

Cerciz.Nder.Maja - July 14, 2014, 11:39 am

(Jul 14, 2014 11:34 AM)Llyn Wrote: [\[CITE\]](#) Trust me in the end it doesn't really matter that much. A lot of idiots will still fall for it. Also as Brad stated earlier it can also be changed to src instead of the exe.

the src option seems less suspicious

do you have any recommendations for a good binder and spoofer?

pablopc98 - July 14, 2014, 11:52 am

This guy is awesome, I added him to skype yesterday and I asked him for help. My RAT didn't connect. He asked me to TeamViewer and he resolved me the problem, was the windows firewall!!! I really like this guy, he help me for free and I am very grateful.

Thank you!

PageMaster - July 21, 2014, 9:46 pm

I am glad I was able to help you guys! If anyone else needs help let me know. I have a new skype FYI so if you need assistance ad The_Page_Master

Oliver Sykes - July 22, 2014, 1:48 am

I've read a tutorial here on HF about this. They put "song title and shit you want" uploaded by {you put a right to left character override character here}3pm
and it shows up as songtitleshitwhatever uploaded by RSC.mp3

IAmNotHere - July 22, 2014, 2:07 am

Hello PageMaster,

Can I have a few test installs?

PageMaster - July 23, 2014, 11:20 pm

Cant Update my post, so for those of you looking for my Premium Services The thread is here:
<https://hackforums.net/showthread.php?tid=4356458>

Geck0 - July 23, 2014, 11:43 pm

Once I crypt my Stub, How can I bind it, change icon. Essentially I want to be able to use one crypted stub for multiple youtube videos and different spreading Methods, is this possible?

xVulnerable - July 24, 2014, 12:01 am

Nice you copied my thread design + text.

PageMaster - July 24, 2014, 12:08 am

Xvulnerable read the other thread that you posted the meme on.

Malcolm???????????????? - July 24, 2014, 6:05 am

add my skype andreas.christensen78

i have problems with setting it up.

Cya there mate :)

PageMaster - July 24, 2014, 10:42 am

I have contacted everyone who has posted or added me on skype so far. If anyone else requires assistance let me know.

IAmNotHere - July 24, 2014, 10:53 am

You didn't contaced me yet. Do you offer 3 free installs still? I can't access the link in a few posts earlier you gave.
