Thread: [Jailbroken Iphone Hotspot?](#)

Meowth - July 13, 2014, 1:45 pm

I currently have a jailbroken Iphone 5 on ios 7.0.4 and I am wondering if without the unlimited data plan or the hotspot plan with my carrier is it possible to still have unlimited hotspot capabilities with my device?

I attempted to use tetherme and I noticed that my data usage was going up while I was using it. How do I get unlimited without using my data?

RelationShit - July 13, 2014, 2:16 pm

Well good luck with that.
You'll need it.

Assuming you are seriously asking this question I'm going to give you a really simple answer:

No.

You're*, and I think he is serious.

Dreams - July 13, 2014, 3:35 pm

No OP. A jailbreak tweak will not allow you to have unlimited data.

Meowth - July 13, 2014, 6:04 pm

I am not joking, I came across this YouTube video here
<http://www.youtube.com/watch?v=Xz6A2igT1N4> and I guess I just misunderstood.

Jhené Aiko - July 13, 2014, 7:28 pm

Simple answer is... you can't! TetherMe uses your mobile data and if you don't have unlimited and go over your allowance it will start to charge you as it shows up as normal data use.

Blazin - July 13, 2014, 7:32 pm

simple answer op.... get unlimited data it's worth it.

Killa Priest - July 13, 2014, 7:36 pm

OP is clearly not the only one who thought this..i for one use to think it was possible.But now, i know better ?

kingkelvin135 - July 15, 2014, 3:58 pm

Go On Cydia and download "TetherMe" gives you unlimited data/HotSpot without you're carrier company knowing.
