Thread: [\[1.3.7\] PASTE.sx - A better pastebin alternative. Fast, secure and feature rich!](#)

Damdomy - July 13, 2014, 7:11 pm

[PASTE.SX](#)

What is it?

Paste.sx is an online code hosting website. It's extremely powerful, secure and easy to use. It packs many features that make it unique to other leading websites such as pastebin.

Features:

- Extremely fast.
- Optional Encryption.
- Password locking.
- Syntax highlighting for over 100 languages.
- Paste expiry option.
- 1 View self-destruct.
- 100% anonymous.
- Easily delete pastes with a "delete token".
- API support.

Change Log:

<https://paste.sx/page/change-log>

Sample Code:

<http://paste.sx/029>

Give me your thoughts and feedback.

Latest change-log:

Version 1.3.5 - 17/08/2014

- Added an anonymous paste view count (session based).
- Sidebar is now hideable to (can speed up the site). Can also allow for larger code viewing.
- Speed optimisation for viewing a paste.
- Download a paste now doesn't add a .txt as the file extension.
- UI changes for dark theme.
- UI changes for sidebar.
- Optimised site on small screens.
- Bug fixes.

Damdomy - July 18, 2014, 8:30 pm

New version is up. Made some changes. Check it out: <http://paste.sx/page/change-log>

- Fixed some security issues. (Thanks TF).
- Fixed some bugs. (Thanks TF).
- Made some UI changes here and there.

API is now ready, check out a link to the docs at the bottom.
Added an FAQ page to explain the features in a little more detail.
Added a contact page.

Nutar - July 23, 2014, 5:20 pm

I'm wondering why you haven't got any replies. This is an awesome contribution to this community. Especially that it's made and monitored by a member of this community.

Also, great work OP. I honestly loved it. You might also take another huge step by designing your own interface and staying away from CSS frameworks. Other than that, I'll use it for all of my pasting needs!

Marshall Mathers - July 24, 2014, 7:04 am

I LOVE Paste.sx :)

Thanks for making this OP.

Antigen - July 24, 2014, 7:07 am

Sick domain, simplistic flat theme awesome functions, what could I ask more ?

TAC2 - July 24, 2014, 7:22 am

I love this, looks awesome and flat, sleek everything.

Good job on this btw do you have skype?

Hire - July 24, 2014, 7:25 am

Looks amazing, just made my account :)

Nutar - July 24, 2014, 9:41 am

Good to see that others replied. I also hope that you make all pastes visible on a page like Pastebin. You can have options for it to be public, unlisted or private. This would open doors for people who want to create some back links, and get you some kind of "natural SEO".

Damdomy - July 24, 2014, 9:48 am

Thank you everyone for the kind words! If anyone has any suggestions, please don't hesitate to PM me or post here.

(Jul 24, 2014 07:22 AM)TAC2 Wrote: [\[CITE\]](#) I love this, looks awesome and flat, sleek everything.

Good job on this btw do you have skype?

Hi, you can go ahead and PM me or email me on i@damdomy.com :)

(Jul 24, 2014 09:41 AM)Calypo Wrote: [\[CITE\]](#) Good to see that others replied. I also hope that you make all pastes visible on a page like Pastebin. You can have options for it to be public, unlisted or private. This would open doors for people who want to create some back links, and get you some kind of "natural SEO".

I'm planning to do that actually :) I've had people say it's one of the reasons they go to pastebin, you know to look at other people's pastes..

Made some fixed (thanks Surpass).

Textboxs are now read-only. The delete button will be visible when the delete hash is set (so fixed it).

Damdomy - July 28, 2014, 9:35 pm

Major update:

Version 1.3.2 - 28/07/2014 You can now edit a paste, if it belongs in your account. Check the 'my' page.

Your recent pastes added.

Recent pastes added.

Added paste view options (Download paste, show/hide line numbers, expand/compress editor, increase/decrease editor font-size, edit paste).

Alert messages now have icons, they just look nicer.

Delete button fixed when delete token is set.

Fixed error when inserting large pastes.

Better password unlocking (Seperate page and will remember the password).

Integrated dataTables.js in the my page, will only be activated if 10 or more pastes are detected.

Cloning a paste now clones the syntax as well.

Some house/code cleaning.

Minor UI changes.

Fixed logout issues.

Database optimisation.

Fixed size calculation.

Any bugs/problems/suggestions/commend post here :)

Haza?d - July 28, 2014, 9:44 pm

I'm not a programmer so this is not really any use to me. But it looks really nice. Much better then pastebin.

This is a bit of topic now but I just want to say I really like your virus scanner and I do use it. I wish you success in your projects.

Damdomy - July 29, 2014, 11:31 am

(Jul 28, 2014 09:44 PM)Minta Wrote: [\[CITE\]](#) I'm not a programmer so this is not really any use to me. But it looks really nice. Much better then pastebin.

Thanks dude, enjoy both of them and don't hesitate to ask for help. :)

Nutar - July 29, 2014, 10:36 pm

Thanks for taking my suggestions into action. Also, here's a bit more suggestions you could consider to make the interface look a bit more nice & clean, <http://prntscr.com/47q6yl> . Other than that, good job with the website. If you need any help with coding, we could make it a collab. project together.

Damdomy - July 29, 2014, 11:15 pm

(Jul 29, 2014 10:36 PM)Calypo Wrote: [\[CITE\]](#) Thanks for taking my suggestions into action. Yeh the sidebar's style is temporary. It looked ok on my screen (1080p) it'll be improved in the next update.

About the colab: it's not as big of a project so 2 people is overkill. Thanks though :)

MrFlippers - July 30, 2014, 12:05 am

Suggestion: Maybe add a Captcha or Re-Captcha?

Griev?us - July 30, 2014, 12:05 am

It's a bit different. Gonna bookmark this and use it instead of pastebin.

Damdomy - July 30, 2014, 12:40 am

(Jul 30, 2014 12:05 AM)MrFlippers Wrote: [\[CITE\]](#) Suggestion: Maybe add a Captcha or Re-Captcha? For what? Making a paste? I won't do that since it is annoying. If it's because of the spam, i thought people wouldn't be childish and do that. They're doing it via the API, i will make the API for registered users only ?

(Jul 30, 2014 12:05 AM)Grievous Wrote: [\[CITE\]](#) It's a bit different. Gonna bookmark this and use it instead of pastebin.

Sounds good mate, any comments/problems just ask!

Revamp - July 30, 2014, 12:44 am

I'm guessing this site is going to turn to a place where ppl post personal info and advertise their site.

MrFlippers - July 30, 2014, 1:11 am

(Jul 30, 2014 12:44 AM)?C??c??? Wrote: [\[CITE\]](#) I'm guessing this site is going to turn to a place where ppl post personal info and advertise their site.

Well us "People" have to Post Dox somewhere... lel Jk

Anyway it looks like a good site OP.

Damdomy - July 30, 2014, 1:15 am

(Jul 30, 2014 12:44 AM)?C??c??? Wrote: [\[CITE\]](#) I'm guessing this site is going to turn to a place where ppl post personal info and advertise their site.

There might be a "report" button in the future. I'll try and keep this as clean as possible.

josiah - July 30, 2014, 4:48 am

Awesome site ?

Definitely gonna use this in the future.

Damdomy - July 31, 2014, 7:31 am

Thanks to an asshole here i've made the API only usable by registered users. I thought people had better things to do..

Operative - July 31, 2014, 7:58 am

Currently viewing the mobile, so far it looks great.

R?DSPY - July 31, 2014, 8:00 am

I'm expecting doxes to be on paste.sx soon.

Damdomy - July 31, 2014, 9:41 am

(Jul 31, 2014 07:58 AM)Operative Wrote: [\[CITE\]](#) Currently viewing the mobile, so far it looks great. The next update will make it look a lot better on mobile.

Hire - July 31, 2014, 9:42 am

Just a quick question; Will logs be handed out to other people? Not cops, like let's say Omni.

Damdomy - July 31, 2014, 9:42 am

(Jul 31, 2014 08:00 AM)RedSpyGentlemen Wrote: [\[CITE\]](#) I'm expecting doxes to be on paste.sx soon.

There will be a "report" button later on. Just need to know how it will make my time easier as in maybe mods/others to watch for them.. Not sure.

(Jul 31, 2014 09:42 AM)Kaoxic Wrote: [\[CITE\]](#) Just a quick question; Will logs be handed out to other people? Not cops, like let's say Omni.

There aren't any logs to begin with :P

Hire - July 31, 2014, 9:43 am

(Jul 31, 2014 09:42 AM)Damdomy Wrote: [\[CITE\]](#) There aren't any logs to begin with :P
That's great, even better. Thanks ?

AvanH - July 31, 2014, 5:09 pm

Much better design than pastebin & more features, I will definitely be using this, thank you!

Damdomy - August 1, 2014, 11:28 am

(Jul 31, 2014 05:09 PM)AvanH Wrote: [\[CITE\]](#) Much better design than pastebin & more features, I will definitely be using this, thank you!

Cheers mate, if you have an suggestions just post here.

Small update just released, check the change log :)

Nutar - August 1, 2014, 11:30 pm

Some noob was trying to "Hack" your website by uploading an .htaccess file -> <http://paste.sx/zjh> :facepalm: or maybe he's just sharing it.

Enforce - August 2, 2014, 12:46 am

Lol I see the first dox already there.

420 Blaze It - August 2, 2014, 12:52 am

Not bad, but the UI has problems, the text are scrambled over images.

Hire - August 2, 2014, 12:52 am

(Aug 2, 2014 12:46 AM)Enforce Wrote: [\[CITE\]](#) Lol I see the first dox already there.
What do you expect lol, this is gonna be used alot

Vegas - August 2, 2014, 1:11 am

You should make a kickstarter for this.

Damdomy - August 2, 2014, 8:22 am

(Aug 1, 2014 11:30 PM)Calypo Wrote: [\[CITE\]](#) Some noob was trying to "Hack" your website by uploading an .htaccess file -> <http://paste.sx/zjh> :facepalm: or maybe he's just sharing it.
He's just sharing a paste :)

(Aug 2, 2014 12:52 AM)420 Blaze It Wrote: [\[CITE\]](#) Not bad, but the UI has problems, the text are scrambled over images.

What's your screen resolution and can you screenshot it please? What page?

(Aug 2, 2014 01:11 AM)Vegas Wrote: [\[CITE\]](#) You should make a kickstarter for this.
I'll add a bitcoin donation page if you're feeling generous <3

Haza?d - August 2, 2014, 9:00 am

What's your screen resolution and can you screenshot it please? What page?

I'll add a bitcoin donation page if you're feeling generous <3
Imfao.

I pasted that .htaccess file. That's just the .htaccess file to my website that I wanted to save.

Why would you assume I was trying to hack the website? I thought the site was supposed to be used for saving pastes. That's what I did.

Damdomy I hope you know I have no intentions on trying to hack the site. I really like the website actually.

I have just set that .htaccess paste to private.

Are we allowed to paste as many private/unlisted pastes as we want? Because I don't want other users looking at my shit.

All my pastes are actually set to private right now, I just don't want you to think i'm trying to abuse the system somehow by doing that. I just don't like it when everyone can see my stuff. I use pastebin for private pastes as well, but the limit is pretty low.

Damdomy - August 2, 2014, 9:23 am

Hey man, you can do whatever you want with the site (other than spam botting).

I never said you were, the user above said that i just cleared it out :P

You can have as many private pastes as you want, the next update will have a "default settings" page to save you time :D

Enjoy mate!

Scars On Broadway - August 2, 2014, 9:26 am

This is looking awesome one of the best websites I have ever seen on here.

Robust - August 2, 2014, 11:48 am

https isn't working, I noticed you use Comodo and it's a common issue with them. You need to combine the bundle using a command like cat to get a verified (green) certificate, instead of the current red one.

Damdomy - August 2, 2014, 1:12 pm

(Aug 2, 2014 11:48 AM)Robust Wrote: [\[CITE\]](#) https isn't working, I noticed you use Comodo and it's a common issue with them. You need to combine the bundle using a command like cat to get a verified (green) certificate, instead of the current red one.

It's working fine here and on 4 more different devices. Can you elaborate on what you mean by combine the bundle?

Robust - August 2, 2014, 1:35 pm

(Aug 2, 2014 01:12 PM)Damdomy Wrote: [\[CITE\]](#) It's working fine here and on 4 more different devices. Can you elaborate on what you mean by combine the bundle?

Not working here. Basically with Comodo certificates you get a pack, a zip, you get about 3-5 .crt files in that and you need to combine them, using the cat command for example and then use that as your certificate instead of just the domain one, it validates the certificate issuer too. Chrome and mobile devices shouldn't show that as green.

<https://support.comodo.com/index.php?/Default/Knowledgebase/Article/View/643/17/>

Did that for myself and several other HF members too.

Damdomy - August 2, 2014, 1:55 pm

That's weird dude, it works on my phone and chrome too..

Robust - August 2, 2014, 2:02 pm

Bundle your certs and it'll work everywhere, atm it's not correctly installed.

Wolfi - August 3, 2014, 9:15 pm

Awesome work dude. ?

In every aspect, its better than pastebin...

The simple but sexy layout, the 'one view self destruct' feature, and the 'lock it with password' which I loved the most.

Keep going with your HQ sites mate... ?

wolfy99 - August 4, 2014, 10:15 pm

I saw this before when you first made a post on it and I'm not sure why I didn't say anything before but I really like it. Great idea, very useful, and a nice UI!

Damdomy - August 4, 2014, 11:28 pm

Thanks for the positive feedback guys.

The next update should fix some bugs and add some more features :)

Just released a new update:

Version 1.3.4 - 01/08/2014

Added a preferences page to customize your default settings instead of choosing everytime. It's under your username.

Added a dark theme (optional).

Lots of bug fixes.

Check out the preferences feature and tell me what you think ?

milkshakehy - August 5, 2014, 7:10 am

Nice and short domain, Good luck with it :)

Nutar - August 5, 2014, 7:56 am

Thanks for the new update. Also, I have some more (repeated) suggestion.

<http://prntscr.com/49s0mn> Hope you fix 'em soon.

Damdomy - August 5, 2014, 10:47 am

The next update will fix all the problems with smaller displays (i promise!)

(Aug 17, 2014 09:27 PM)RedSpyGentlemen Wrote: [\[CITE\]](#) Ohhh damnnn, I see so many doxes. Making the new skidpaste I see ?

Yeh.. I expected people to act maturely since i respected their privacy. There will be a report button in the future. Should've known better.

(Aug 17, 2014 05:59 PM)Fredo Santana Wrote: [\[CITE\]](#) looks dope i might use it soon will bookmark it

Cheers mate. If you use paste website regularly then i recommend you register and setup your preferences. It saves you a lot of time :)

XOwnage - August 18, 2014, 6:46 am

The site looks pretty clean, the recent pasted don't look that good but it got already mentioned. I bookmarked it :)

Damdomy - August 18, 2014, 12:03 pm

New update:

Version 1.3.5 - 17/08/2014

Added an anonymous paste view count (session based).

Sidebar is now hideable to (can speed up the site). Can also allow for larger code viewing.

Speed optimisation for viewing a paste.

Download a paste now doesn't add a .txt as the file extension.

UI changes for dark theme.

UI changes for sidebar.

Optimised site on small screens.

Bug fixes.

Fredo Santana - August 18, 2014, 4:25 pm

You should make a report people posting all this illegal stuff.

Damdomy - August 19, 2014, 12:10 am

(Aug 18, 2014 04:25 PM)Fredo Santana Wrote: [\[CITE\]](#) You should make a report people posting all this illegal stuff.

Yeh will be done but need to know a way to efficiently moderate it.

Haza?d - August 30, 2014, 12:48 pm

You know I noticed if you type in www.paste.sx it doesn't take you to the website. You should fix that.

Damdomy - August 30, 2014, 1:59 pm

(Aug 30, 2014 12:48 PM)Minta Wrote: [\[CITE\]](#) You know I noticed if you type in www.paste.sx it doesn't take you to the website. You should fix that.

It's not needed in this application it was disabled intentionally :)

I'll have it redirect to non-www later on though, thanks.

SIM-1809171 - August 30, 2014, 2:03 pm

So what's the difference between this and pastebin? Like seriously. Not moaning because it's a nice site but I just wanna know:)

Damdomy - August 30, 2014, 2:24 pm

(Aug 30, 2014 02:03 PM)e4stwood Wrote: [\[CITE\]](#) So what's the difference between this and

pastebin? Like seriously. Not moaning because it's a nice site but I just wanna know:)

Well, this is more private than pastebin.

Pastebin is run by feds.

Minor features such as themes, one view, password, ssl and preferences.

I don't expect this to become huge/big/medium at all. It was just made in my spare time. It was initially just for me to use so i can link my code to put inside uni-work to make the doc look nicer. Had good feedback and decided to continue the dev :)

Stay Plural - August 30, 2014, 2:26 pm

Seems like a great part of the community uses this website over pastebin!

Damdomy - August 30, 2014, 2:28 pm

(Aug 30, 2014 02:26 PM)Stay Plural Wrote: [\[CITE\]](#) Seems like a great part of the community uses this website over pastebin!

As much as i hate seeing those, they won't be removed until someone emails/reports them.

Also, this dox is not from this forum..

Seriously, i hate seeing them so much..

wolfy99 - August 30, 2014, 4:54 pm

Not sure if someone has said this yet but: when you're creating a paste and you click on the little gear button (which is to configure default settings) you should either make it so it opens in a new window, or saves your paste temporary because I know I just typed out a lot of text as an example, and when I click that I lost it all which can be very annoying if people are using it often (in my case it was only a test so it didn't bother me too much ?). Thanks!

Damdomy - August 31, 2014, 1:32 am

(Aug 30, 2014 04:54 PM)wolfy99 Wrote: [\[CITE\]](#) Not sure if someone has said this yet but: when you're creating a paste and you click on the little gear button (which is to configure default settings) you should either make it so it opens in a new window, or saves your paste temporary because I know I just typed out a lot of text as an example, and when I click that I lost it all which can be very annoying if people are using it often (in my case it was only a test so it didn't bother me too much ?). Thanks!

That's clearly not practical. Will be fixed soon.

NETExplorer - August 31, 2014, 9:56 pm

I was bored, so I made a fully-fledged wrapper for your API in C#:

<https://gist.github.com/PatPositron/cc2007bfcffb08708061>

Damdomy - September 1, 2014, 12:53 pm

That shouldn't be there :P

I'll take your suggestion into consideration!

Damdomy - September 16, 2014, 4:29 pm

Version 1.3.6 - 17/09/2014

Improved API docs.

Bug fixes.

New API features.

You can choose paste syntax.

You can choose expiry value.

You can now choose visibility.

Added embedding code for HTML and BB code (paste view).

Speed improvements.

Fixed multi page CSRF error.

Paste hash is now stored in sessions instead of in the URL.

C# API code added (Thanks PatPositron).

[\[C#\] C# paste.sx API wrapper by PatPositron](#) - paste.sx

New php api code: [\[PHP\] Paste.sx API - PHP](#) - paste.sx

Damdomy - September 19, 2014, 12:04 pm

Fixed bug where you cant create pastes as a guest (so sorry)..

HaX420 - September 22, 2014, 1:43 am

Wow you came a long way. Good job bro.

Thanks buddy.

A question for you guys. I'm coding the moderation panel at the moment. I want to know if i (and potentially other mod) should be able to see all pastes (public and private) i'm asking for ethical/anonymity issues.. Or just be able to view "flagged/reported" ones (an upcoming feature). Your input is greatly appreciated.

New update guys.

Version 1.3.7 - 24/09/2014

Speed improvments for the "my" page.

Enabled Google's pagespeed

Added visibility indicator in paste view.

UI changes.

Bug fixes.

Damdomy - October 15, 2014, 8:36 am

Do you guys think a comment section would be useful?

Haza?d - October 17, 2014, 8:44 am

The websites down? Whats going on? It's not loading for me.

Bug fixes.

Totally only flagged ones. Obviously.

Haza?d - October 17, 2014, 12:33 pm

You know what sucks? You can't go back and edit a paste. You can only clone it and add on to it. I feel like i'm wasting your server resoruces becuase i'm constantly cloning pastes adding on little stuff to a paste.

Damdomy - October 18, 2014, 6:53 am

I don't think that'll ever be a feature mate.

I just think it would cause problems.

Zikk - November 16, 2014, 6:43 am

PHP Code

```
<?php
```

```
Array ( [status] => error [message] => Invalid paste content. )
```

Bin4ry - November 16, 2014, 9:06 am

It looks very smooth and sexy :)

only thing i could think is that you could move the recent pastes window to the right instead.

and i dont personally like bootstrap, basicly cause it limits your creativity IMO.

Good job and good luck!

Regards,

Bin4ry

Thanks for the input mate :)

jaykae - November 16, 2014, 12:49 pm

VIEW ONLY FLAGGED ONES, THEN ITS 100% :/

Im Geeqo - November 16, 2014, 3:21 pm

Dude! this site is awesome, so clean and nice to look at. So going to use it. Good job!

Damdomy - November 17, 2014, 3:01 am

I've made it so mods can see listed and unlisted pastes. You can email me if you think a paste shouldn't be there (dox, cc, passwords, etc.).
We cannot see any private pastes, though.

A n g e l - November 17, 2014, 9:34 am

That's a sick domain and the layout is amazing!
the only thing that bothers me is that Public recent pastes should be wider imo ?

Damdomy - November 18, 2014, 5:08 pm
