Thread: [Simple SQLi Dork Scanner v2.1](#)

RieqyNS13 - July 14, 2014, 2:26 am

screenshoot as following:

Spoiler ([Click to View](#))

Spoiler ([Click to View](#))

Spoiler ([Click to View](#))

features:

Code 2 search engine(google & bing)

depth scan

import url from file

proxy list

input google captcha(not available in Bing)

i've added form to input google captcha, because when you too often dorking with Google search engine, google blocked you with a captcha.

the captcha Input Form will enable if you choose google search engine.

this tool also more efficient than before version because the before version often not respond when you start scan process.

the usage is simple: enter your dork in Dork textbox. then choose search engine which you want to use. if you not choose search Engine, the program automatically use Google as search engine. then click "Search" button. wait a moment after the program display all urls.

second step: if search process has done, click "Scan" button. the scan process begin.
you can use Depth scan feature or proxy if you want

I hope useful for you ?

I think this looks very awesome! Thanks for the share, I was looking for one of these & found it right here! :)

24/7 - July 14, 2014, 2:56 pm

I've personally tested this, and it works awesome.
Mind sharing the source?

RieqyNS13 - July 14, 2014, 11:01 pm

actually i've shared the source code at [this thread](#),
but the old version of the program

KingsmanShire - July 15, 2014, 12:36 am

Thanks works great and here a scan [Virus Total](#)

Thankyou So So Much for this! I have been on the lookout for this, any chance there is more versions aswell?? :) And again Thankyou!

Poper21 - August 17, 2014, 4:30 pm

Does it look for vulnerable links and things like that? :) thanks

I2killer01 - August 31, 2014, 7:39 am

Muito bom Otimo programa melhor forum Brasil deveria ter um como esse

00vama00 - September 30, 2015, 8:30 pm

hello, thanks for the share it will be of much use

Trillantics - January 19, 2016, 6:47 pm

Thanks for the share. I'll see if I can put it to good use!

shadowc0de - May 7, 2016, 2:27 am

thankz for share this app sir.

d3struction - December 27, 2016, 2:58 pm

There seems to be an error with google captcha and also most asp vulnerabilities are not recognized in this version but are recognized in the old version. It would be great if you could update and fix the bugs. Appreciated truly :)

-_Error 404-_ - December 27, 2016, 3:14 pm

Nice work!

Seems like a good scanner, but it would be better to try bypassing captcha,

*Please post a virus scan ?

RisenXHacking - December 28, 2016, 3:17 pm
