After having multiple scammers on kik, I thought it may be a good idea to make a blacklist for kik pedos. So if you have been scammed on kik, post his name and/or a screenshot so others know they shouldn't be doing business with this pedos.

Fuck the pedos

It could be me, but this seems useless,

You don't need an legit email to make a new kik,

Why would someone who scam use the same username for a long period of time?
