Thread: [AddMeFast.Com Points Bot - 1200 Points/Hour \[UPDATED\]\[FREE\]](#)

Pitimauf - July 15, 2014, 1:30 am

Hello HF ?

First of all I want to state that this is not my program , I did not code it.

The program is free for use and I am going to write a tutorial for it and where you can get it from.

This bot is a standalone tool for windows (and requires .NET Framework 4.0) and will gain you round about 1,200 points in an hour. It is possible to run this bot multiple times. You dont need to install some browser plugins or something else. Just

- (1) Download the AddMeFastBot.exe file
- (2) Start AddMeFastBot.exe
- (3) Type in your account informations (if you are scared about typing in your account details: create a new account -this tool is not a keylogger or related programs, but safety goes first)
- (4) Click "Start". :-)

Here's a screenshot :

Virus Scan : [Click Here](#)

NOTES

I have checked the program under sandboxie , it has no viruses , you may also check it. The file is CLEAN

I did not code this program

This program is working and updated as 15 July 2014

It generates over 1k points in 1 hour.

Current Updates:

2014/07/15 - Delay decreased to 30 seconds. Repeater inserted if something went wrong. No more bugs , program can run 24/7 without any error.

This does not ban your account , tested it multiple times , I am actually running it right now.

Please post in this thread to keep it alive , thank you ?

Anyone vouch for this? looks interesting

Nash. - July 15, 2014, 2:43 am

Looks very interesting, will try it out!

Virus scan the product itself, instead of the site.

When you are submitting a direct link to a file (.zip,.rar,.exe) virustotal will scan that file ?

You are free to run it on virtual machine , sandboxie , and do more scans as you wish , because I stated that I know safety is first.

I can guarantee you that the program is 100% safe and clean.

Damn. Well, at least you can change your IP, and MAC, then try again on a new account, still get to use it that way (:

My top tips, dont run 12 bots all at once to the same account. They do actually keep tabs on account activity.

Im using the same account for 4 days now running 6 hours a day this bot and I am still not banned :)

I guess it depends on luck though.

I have few suggestions though :

- Use the points immediatly you generate them

(This way you won't regret being banned with 5k points on)

- When you create a new account use another IP

- Do not run more than 2 clients(bots) to avoid ban

?

ROD1200 - July 16, 2014, 9:15 pm

Only ran 2 and got banned immedietly...

xploD - July 17, 2014, 3:17 am

Obviously no point as it's easily detected

spleken001 - July 17, 2014, 5:41 am

it can earn money in addmefast?

.....

...If you mean points , yes.

At the guys above saying it banned your account , I don't know .. it didn't happen for me and I have this still open , account is old for 5 days now.

If you think it bans your account and you are afraid about it , you can easly create a new account and make points.

Thanks. ?

Lights Outt - July 17, 2014, 6:31 am

I ran 1 bot and got banned instantly wtf.

CptKushh - July 17, 2014, 11:53 am

Runned for 2 minutes. Not a single point given and then I were banned.
